## Your Rights in Spain After Brexit

Many British expats living in Spain are concerned about how their rights in the country will be affected now that Brexit has happened. Will they suddenly become second class citizens in the country that they call home? During the Transition Period (which lasted until 31st December) nothing changed and all of your existing rights were protected.

After this the Withdrawal Agreement came into force, serving to protect many of the rights of British people living in Spain and its Territories (like the

Canary Islands). This includes, but is not limited to:

- The right of British citizens who are legal Spanish residents to be able to continue to live and work in Spain

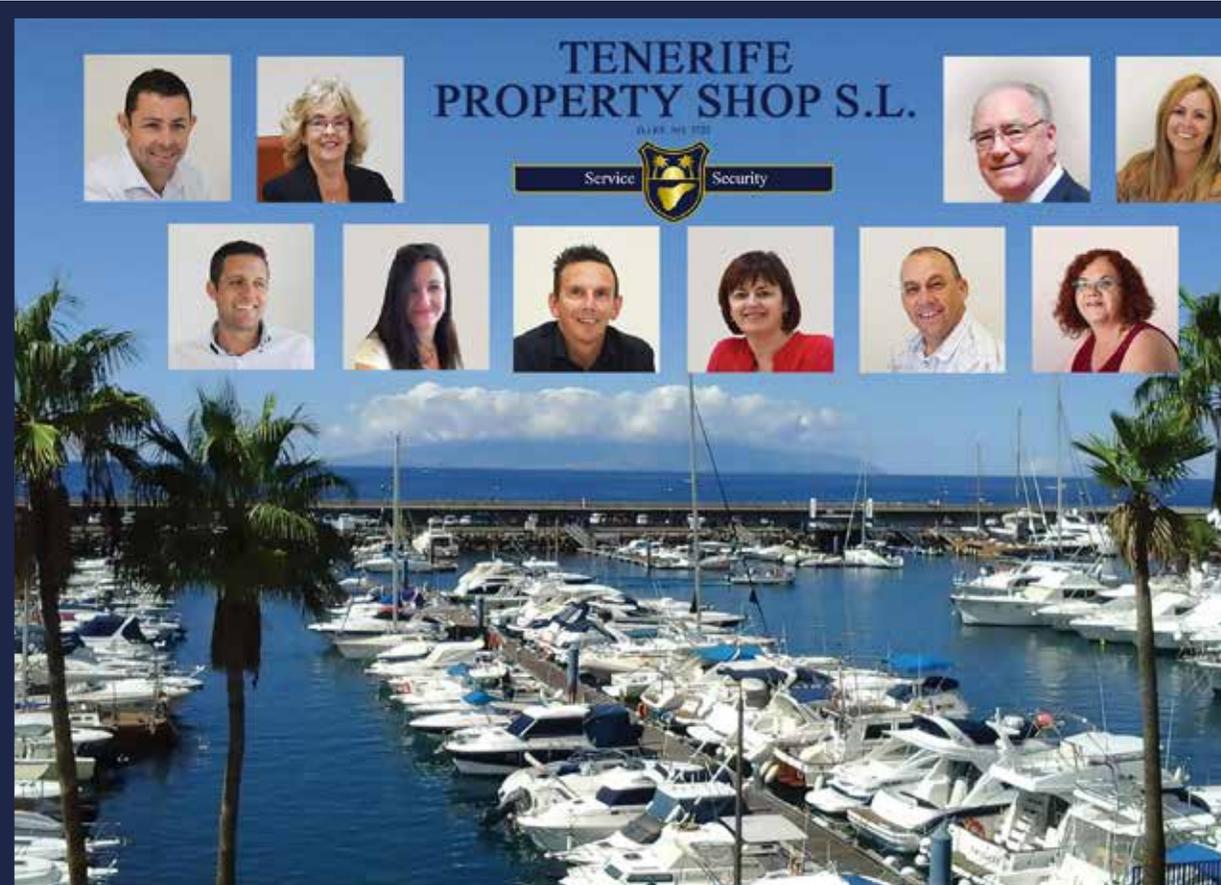

- UK state pensioners continue to have the right to access lifelong healthcare as long as they remain living in Spain. This also applies to residents who claim a UK state pension in the future, provided that they are legally Spanish residents.

- British citizens living in Spain will continue to have the UK state pen-

sion updated, in line with the rest of the UK.

- British citizens living in Spain were able to exchange their driving licence until the end of 2020 without taking a driving test. What's more, this Spanish driving licence will be accepted in the UK when they visit.

Note: It is important to note that you were only be eligible for these rights under the Withdrawal Agreement if you were registered as a Spanish resident by the end of 2020.

## Tenerife Property Shop S.L. honoured with two International Property Awards!

est, most prestigious, and widely recognised awards, which are judged by an independent panel of over 80 industry experts, chaired by Lord Caithness, Lord Best and Lord Waverley, members of the House of Lords in the UK Parliament. The importance of these awards cannot be underestimated, as they are a testament to how everybody working in the company has strived to be the best they can to give service and security to their clients, resulting in Tenerife Property Shop S.L. receiving these awards.

staff of this company have been working for the company for very many years, creating an excellent foundation of knowledge, strength and continuity of service. They are dedicated and incredibly talented individuals who have worked tirelessly over decades for their clients, keeping this company at the forefront of everything that is best in their industry."

Not only is this good for Tenerife Property Shop S.L., but it is also good for Tenerife, in showing that there is a high quality of professional business here, so this company is to be congratulated for their tremendous achievements.

Tenerife Property Shop S.L. has been honoured with two more International Property Awards in the categories of 'Best Canary Islands Estate Agent' and 'Best Estate

Agency Website' – 2020, to add to the already impressive awards that they have been presented with during the past 34 years of assisting their clients to purchase property here in

Tenerife. They have been recognised for the standard of service that they give to their clients and for the exceptional quality of their website, giving an

extraordinary amount of information for visitors to the site and the best portfolio of properties for sale in the south of Tenerife.

The European Property Awards are the larg-

1 BEDROOM APARTMENT - GOLF DEL SUR

A very nicely presented one bedroom apartment, situated in a vibrant development with great views over the lagoon like swimming pool. The complex boasts lush tropical gardens, a cascading waterfall, pool bar/restaurant, satellite TV, heated pool, a children's park and is secure. The apartment occupies a 2nd floor position and is South facing and therefore offers sun all day.

Ref: GOLF01638

Price: €139,500 (approx. £127,000)

1 BEDROOM APARTMENT - LOS CRISTIANOS

Front line to the ocean in Los Cristianos, with everything in walking distance, this property must be viewed. Located on one of the higher floors this one bedroom, one bathroom apartment has fantastic views to the sea and coastline. The complex has wheelchair access, and the communal pool has recently been reformed. Fantastic location for the beach and all amenities in the Los Cristianos area.

Ref: LC00594

Price: €175,000 (approx. £159,000)

# Tenerife Island Rentals & Buy Tenerife

## Sales

### CHIO, GUÍA DE ISORA

Beautiful property with stunning views to the neighbouring island of La Gomera and to Mount Teide. On entering the property you find a secluded courtyard with outdoor eating area. Leading from the terrace you enter a spacious dining room which then leads to a stunning living room with wooden vaulted ceiling and patio doors to the terrace. There is a separate fitted kitchen off the dining room. On the ground floor there is a large double bedroom and a bathroom with walk-in shower and a storeroom. On the upper floor there are two bedrooms, the master has a wooden vaulted ceiling. Both bedrooms have balconies and plenty of storage space. Lots of outdoor space with an additional plot of urban land of 200m<sup>2</sup> to be developed.

Ref: MAS0603

€299,000

### VALLE SAN LORENZO

This townhouse is located in a quiet area of Valle San Lorenzo and only five minutes to the main road of the town. Distributed over two floors. On the ground floor there is an integrated garage, a room with direct access to the garden, a bathroom and two walk in cupboards. Leaving the ground floor there is a patio with stairs to the upper floor. Upstairs there is a kitchen, living room, bedroom, bathroom and terrace with sea views. There is a roof terrace that covers the entire property with views of the sea and mountains. It has a large garden of approximately 200m<sup>2</sup> with a parking space. Impressive house with many possibilities.

Ref: ADO0592

€179,995

### EDIFICIO AMANECER, ADEJE

Nice two bedroom apartment in a central location of Adeje, double bedroom and single bedroom. Good size living room with American style kitchen, bathroom with shower unit and small Juliette balcony. There is lift access to the apartment and the El Galeon shopping centre is located within a five minute walk from the apartment. This is an excellent investment opportunity or starter home.

Ref: APO604

Nonviolent protests are twice as likely to succeed as armed conflicts – and those engaging a threshold of 3.5% of the population have never failed to bring about change.

David Robson, Senior Journalist, BBC Future.

## The '3.5% rule': How a small minority can change the world

In 1986, millions of Filipinos took to the streets of Manila in peaceful protest and prayer in the People Power movement. The Marcos regime folded on the fourth day.

In 2003, the people of Georgia ousted Eduard Shevardnadze through the bloodless Rose Revolution, in which protestors stormed the parliament building holding the flowers in their hands. While in 2019, the presidents of Sudan and Algeria both announced they would step aside after decades in office, thanks to peaceful campaigns of resistance.

In each case, civil resistance by ordinary members of the public trumped the political elite to achieve radical change. There are, of course, many ethical reasons to use nonviolent strategies. But compelling research by Erica Chenoweth, a political scientist at Harvard University, confirms that civil disobedience is not only the moral choice; it is also the most powerful way of shaping

world politics – by a long way.

Looking at hundreds of campaigns over the last century, Chenoweth found that nonviolent campaigns are twice as likely to achieve their goals as violent campaigns. And although the exact dynamics will depend on many factors, she has shown it takes around 3.5% of the population actively participating in the protests to ensure serious political change. Chenoweth's influence can be seen in the recent Extinction Rebellion protests, whose founders say they have been directly inspired by her findings. So just how did she come to these conclusions?

Needless to say, Chenoweth's research builds on the philosophies of many influential figures throughout history. The African-American abolitionist Sojourner Truth, the suffrage campaigner Susan B Anthony, the Indian independence activist Mahatma Gandhi and the US civil rights campaigner Martin

Luther King have all convincingly argued for the power of peaceful protest.

Yet Chenoweth admits that when she first began her research in the mid-2000s, she was initially rather cynical of the idea that nonviolent actions could be more powerful than armed conflict in most situations. As a PhD student at the University of Colorado, she had spent years studying the factors contributing to the rise of terrorism when she was asked to attend an academic workshop organised by the International Center of Nonviolent Conflict (ICNC), a non-profit organisation based in Washington DC. The workshop presented many compelling examples of peaceful protests bringing about lasting political change – including, for instance, the People Power protests in the Philippines.

But Chenoweth was surprised to find that no-one had comprehensively compared the success rates of nonviolent versus vio-

lent protests; perhaps the case studies were simply chosen through some kind of confirmation bias. "I was really motivated by some scepticism that nonviolent resistance could be an effective method for achieving major transformations in society," she says

Working with Maria Stephan, a researcher at the ICNC, Chenoweth performed an extensive review of the literature on civil resistance and social movements from 1900 to 2006 – a data set then corroborated with other experts in the field. They primarily considered attempts to bring about regime change. A movement was considered a success if it fully achieved its goals both within a year of its peak engagement and as a direct result of its activities. A regime change resulting from foreign military intervention would not be considered a success, for instance. A campaign was considered violent, meanwhile, if it involved bombings, kidnap-

aigns were twice as likely to succeed as violent campaigns: they led to political change 53% of the time compared to 26% for the violent protests.

This was partly the result of strength in numbers. Chenoweth argues that nonviolent campaigns are more likely to succeed because they can recruit many more participants from a much broader demographic, which can cause severe disruption that paralyses normal urban life and the functioning of society.

In fact, of the 25 largest campaigns that they studied, 20 were nonviolent, and 14 of these were outright successes. Overall, the nonviolent campaigns attracted around four times as many participants (200,000) as the average violent campaign (50,000).

The People Power campaign against the Marcos regime in the Philippines, for instance, attracted two million participants at its height, while the Brazil-

called the "3.5% rule". Besides the People Power movement, that included the Singing Revolution in Estonia in the late 1980s and the Rose Revolution in Georgia in the early 2003.

Chenoweth admits that she was initially surprised by her results. But she now cites many reasons that nonviolent protests can garner such high levels of support. Perhaps most obviously, violent protests necessarily exclude people who abhor and fear bloodshed, whereas peaceful protesters maintain the moral high ground.

Chenoweth points out that nonviolent protests also have fewer physical barriers to participation. You do not need to be fit and healthy to engage in a strike, whereas violent campaigns tend to lean on the support of physically fit young men. And while many forms of nonviolent protests also carry serious risks – just think of China's response in Tiananmen Square in 1989

The organisers of Extinction Rebellion have stated that Chenoweth's work inspired their campaign.

lings, the destruction of infrastructure – or any other physical harm to people or property.

"We were trying to apply a pretty hard test to nonviolent resistance as a strategy," Chenoweth says. (The criteria were so strict that India's independence movement was not considered as evidence in favour of nonviolent protest in Chenoweth and Stephan's analysis – since Britain's dwindling military resources were considered to have been a deciding factor, even if the protests themselves were also a huge influence.)

By the end of this process, they had collected data from 323 violent and nonviolent campaigns. And their results were striking!

Overall, nonviolent cam-

ian uprising in 1984 and 1985 attracted one million, and the Velvet Revolution in Czechoslovakia in 1989 attracted 500,000 participants.

"Numbers really matter for building power in ways that can really pose a serious challenge or threat to entrenched authorities or occupations," Chenoweth says – and nonviolent protest seems to be the best way to get that widespread support.

Once around 3.5% of the whole population has begun to participate actively, success appears to be inevitable.

"There weren't any campaigns that had failed after they had achieved 3.5% participation during a peak event," says Chenoweth – a phenomenon she has

– Chenoweth argues that nonviolent campaigns are generally easier to discuss openly, which means that news of their occurrence can reach a wider audience. Violent movements, on the other hand, require a supply of weapons, and tend to rely on more secretive underground operations that might struggle to reach the general population.

By engaging broad support across the population, nonviolent campaigns are also more likely to win support among the police and the military – the very groups that the government should be leaning on to bring about order.

During a peaceful street

Having attracted millions of supporters, the People Power demonstrations removed the Marcos regime in the Philippines

protest of millions of people, the members of the security forces may also be more likely to fear that their

place people in as much physical danger, particularly as the numbers grow, compared to armed activity," Chenoweth says. "And the techniques of nonviolent resistance are often

times because they never really gained enough support or momentum to "erode the power base of the adversary and maintain resilience in the face of repression". But some relatively large nonviolent protests also failed, such as the protests against the communist party in East Germany in the 1950s, which attracted 400,000 members (around 2%

An elderly woman talks to the Algerian security forces during the recent protests

family members or friends are in the crowd – meaning that they fail to crack down on the movement. "Or when they're looking at the [sheer] numbers of people involved, they may just come to the conclusion the ship has sailed, and they don't want to go down with the ship," Chenoweth says.

In terms of the specific strategies that are used, general strikes "are probably one of the most powerful, if not the most powerful, single method of nonviolent resistance", Chenoweth says. But they do come at a personal cost, whereas other forms of protest can be completely anonymous. She points to the consumer boycotts in apartheid-era South Africa, in which many black citizens refused to buy products from companies with white owners. The result was an economic crisis among the country's white elite that contributed to the end of segregation in the early 1990s.

"There are more options for engaging and nonviolent resistance that don't

more visible, so that it's easier for people to find out how to participate directly, and how to coordinate their activities for maximum disruption."

**A magic number?**

These are very general patterns, of course, and despite being twice as successful as the violent conflicts, peaceful resistance still failed 47% of the time. As Chenoweth and Stephan pointed out in their book, that's some-

of the population) at their peak, but still failed to bring about change.

In Chenoweth's data set, it was only once the nonviolent protests had achieved that 3.5% threshold of active engagement that success seemed to be guaranteed – and raising even that level of support is no mean feat. In the UK it would amount to 2.3 million people actively engaging in a movement (roughly twice the size of Birmingham, the UK's second largest city);

A couple commemorate the Velvet Revolution of 1989, which helped bring down Communist rule in Czechoslovakia - another example of Chenoweth's "3.5% rule"

Nonviolent protests are more likely to attract support from across society. Here a pro-reform protestor faces security forces in Morocco in 2011

in the US, it would involve 11 million citizens – more than the total population of New York City. The fact remains, however, that nonviolent campaigns are the only reliable way of maintaining that kind of engagement.

Chenoweth and Stephan's initial study was first published in 2011 and their findings have attracted a lot of attention since. "It's hard to overstate how influential they have been to this body of research," says Matthew Chandler, who researches civil resistance at the University of Notre Dame in Indiana.

Isabel Bramsen, who studies international con-

flict at the University of Copenhagen agrees that Chenoweth and Stephan's results are compelling. "It's [now] an established truth within the field that the nonviolent approaches are much more likely to succeed than violent ones," she says.

Regarding the "3.5% rule", she points out that while 3.5% is a small minority, such a level of active participation probably means many more people tacitly agree with the cause.

These researchers are now looking to further untangle the factors that may lead to a movement's success or failure. Bramsen and Chandler, for instance, both emphasise the importance of unity among demonstrators.

As an example, Bramsen points to the failed uprising in Bahrain in 2011. The campaign initially engaged many protestors, but quickly split into competing factions. The resulting loss of cohesion, Bramsen thinks, ultimately prevented the movement from gaining enough momentum to bring about change.

Chenoweth's interest has recently focused on protests closer to home –

like the Black Lives Matter movement and the Women's March in 2017. She is also interested in Extinction Rebellion, recently popularised by the involvement of the Swedish activist Greta Thunberg. "They are up against a lot of inertia," she says. "But I think that they have an incredibly thoughtful and strategic core. And they seem to have all the right instincts about how to develop and teach through a nonviolent resistance campaigns."

Ultimately, she would like our history books to pay greater attention to nonviolent campaigns rather than concentrating so heavily on warfare. "So many of the histories that we tell one another focus on violence – and even if it is a total disaster, we still find a way to find victories within it," she says. Yet we tend to ignore the success of peaceful protest, she says.

"Ordinary people, all the time, are engaging in pretty heroic activities that are actually changing the way the world – and those deserve some notice and celebration as well."

From BBC News

# Will the EHIC still be valid after Brexit?

**If you are planning a holiday in a country in the European Union (EU) in 2021, you might be wondering whether your European Health Insurance Card (EHIC) will still be valid.**

**What is an EHIC?**

The EHIC entitles the

holders to state-provided medical treatment if they fall ill or have an accident in any EU country, or in Switzerland, Norway, Iceland and Liechtenstein, where the scheme also applies. Access to this scheme is being phased out for the UK but the government says it is setting up a re-

placement.

The UK has issued 27 million EHIC cards. They cover pre-existing medical conditions and routine maternity care, as well as emergency care. Individuals with chronic illnesses, for example those who require dialysis, can travel knowing they will receive treatment on the same

terms as the citizens of the country they are visiting.

**What will happen from 2021?**

The deal on the future relationship between the EU and the UK was announced on 24 December. It says that all EHIC cards issued before the end of 2020 will be valid until their expiry date. After that, the UK will issue a replacement which the UK government says will be called the UK Global Health In-

## MAKING YOUR HOUSE A HOME

STUDIO4DECOR'S FABULOUS NEW SHOWROOM AND TERRACE FURNITURE SHOP IN LOS ABRIGOS ARE NOW OPEN FOR BUSINESS!

The Studio4decor team are waiting to help turn your house into a home. We have furniture to suit all tastes and budgets and an "On site" workshop making Bespoke Sofas, Headboards, Pelmetts and made-to-measure Curtains. We also now offer a great range of blinds, both electric and manual, and in our Exterior Furniture Showroom we have an extensive choice of Sunbeds, Sofa sets, Day beds, pots and artificial plants and much more. Call into the Showroom for a "no obligation" quote. We are on the main road into Los Abrigos Village from Las Chafiras Industrial Estate on the left-hand side. Let us turn your house into a home.

- ✓ Full re-upholstery service available
- ✓ Bespoke sofas, headboards and pelmetts
- ✓ Beautiful made-to-measure curtains
- ✓ 1,000's of fabric swatches to choose from

Call into our Los Abrigos Showroom (29 Calle La Marina, Edificio Bogavante) and let us help turn your ideas into reality.

Beautiful interiors at a price you can afford!

## Brexit deal helps the pound close 2020 on a positive note

Staying on top of the latest currency news can help you time your transfers more effectively, so find out what you should be looking out for over the next couple of weeks...

### Latest currency news

The biggest story over the past couple of weeks was the announcement of a last-minute Brexit deal, which helped to lift the Pound.

During this time, we've seen GBP/EUR fluctuate between 1.09 and 1.12 whilst EUR/GBP slipped back to 0.90.

Meanwhile, GBP/USD climbed from 1.35 to 1.36, at the same time that EUR/USD jumped from \$1.21 to \$1.23.

### What's been happening?

The pound received a shot in the arm in the final couple weeks of 2020 as an eleventh-hour Brexit trade deal between the UK and EU prompted a notable relief rally in Sterling.

However, a large portion of these gains were erased at the start of 2021 following the news that most parts of the UK would be going back into a strict lockdown.

Meanwhile the US dollar selling bias remained firmly entrenched, with the safe-haven currency crumbling to a new 32-month low amid a prevailing risk-on mood.

At the same time, the euro has largely maintained its bullish run through the end of 2020 and into 2021,

with the single currency's negative correlation with the US dollar offsetting concerns over tougher coronavirus restrictions.

### What do you need to look out for?

Looking ahead, any upside in the pound is likely to remain limited through the first half of January as the new lockdown measures will undoubtedly stoke fears of a double-dip recession in the UK.

The euro could also face some hurdles in the coming weeks, amid the spread of a more infectious strain of

Covid across the continent and concerns over the slow pace of vaccine rollouts in the EU.

For USD investors the focus looks to be on the incoming Biden administration, with hopes for more stimulus

measures likely to help prop up market sentiment and weaken the US dollar.

At Currencies Direct, we're here to talk currency whenever you need us, so get in touch if you want to know more about the latest news or

how it could impact your currency transfers. Since 1996, we've helped more than 325,000 customers with their currency transfers, just pop into your local Currencies Direct branch or give us a call to find out more.

insurance Card (GHIC), but there are no further details yet on how to obtain it.

Like EHIC, the new card will cover chronic or existing illnesses and routine maternity care as well as emergencies. The Brexit agreement says any specialised treatment, such as dialysis or cancer treatment, "must be subject to a prior agreement between the insured person and the

unit providing the treatment," to ensure the treatment is available.

However, the UK government still advises that you should buy travel insurance with healthcare cover before you go on holiday.

**What about health cover for EU citizens living in the UK?**

EU nationals who were living in the UK before the end of 2020 will be able to continue using the NHS for their healthcare while res-

ident here. They will also be able to continue using their EHIC when they travel to another EU country, and will be entitled to apply for a new UK card in due course. An estimated 3.7 million EU nationals lived in the UK in 2019, making up 5.6% of the UK population. Their rights are guaranteed by the UK-EU withdrawal agreement, which is written into UK law.

**Healthcare deals with non-EU countries**

The UK has reciprocal health deals with a few non-EU countries, including Australia and New Zealand, under which visitors can receive urgent treatment at a reduced cost or for free. In other words, visitors are treated as if they are resident of the country in question. But unlike the EHIC, the agreements do not cover pre-existing conditions.

# Baking soda tips: 10 household uses for baking soda

**BAKING SODA** doesn't just make cakes rise, it's the perfect cleaning product for all sorts of household items. Here are 10 household uses for baking soda.

You don't have to spend a fortune on cleaning products. In fact, most of the things you need will already be in your kitchen cupboard. Cleaning experts such as Mrs Hinch will sometimes use food items like white vinegar or lemon to clean their homes. Baking soda is another example of an ingredient which can be used for recipes and chores. Express.co.uk reveals 10 household uses

for baking soda.

**Is baking powder the same as baking soda?**

Baking powder and baking soda are different things. Both are leavening agents that look exactly the same, but they are slightly different.

Baking soda needs an acid AND a liquid to activate and help baked goods rise, but baking powder only needs a liquid to become activated.

Baking powder, therefore, isn't as strong as baking soda. If you were substituting baking powder for baking soda, you'd need to use three times more baking powder than baking

soda. On the other hand, baking soda and bicarbonate of soda are the same thing. They are both formally known as NaHCO<sub>3</sub> or sodium bicarbonate. People in the UK and Australia tend to call it bicarbonate of soda but Americans usually say baking soda.

**Carpet and mattress**

Baking soda is great for removing stains and bad odours, so it's the perfect tool for cleaning mattresses and carpets. Of course, you may want to do a deep clean which involves getting these surfaces wet and using a cleaner, but baking soda will freshen them up and get rid of nasty bacteria lurking in the material.

Smear a solution of baking soda and water on any stains and sprinkle the rest of the tub all over the mattress or carpet. Leave it to sit overnight or for as long as possible and then Hoover up the remains or wipe away the pasty solution with a damp cloth.

You can clean the inside of shoes in the same way.

**Plug holes or drains**

If your drain is clogged or smelly, baking soda can sort this out. Simply pour 200g of baking soda (about half a cup) down the drain of the sink or bath and then pour half a cup of vinegar after it. Cover the hole with a wet cloth and leave the mixture to fizz for five minutes. Flush the drain with hot water to get rid of the remnants and you should have a clean drain.

**Walls**

Walls get pretty dirty too with mucky handprints and accidental splashes of food and other unfortunate accidents. Use a damp sponge to apply baking soda to the stains on the wall. Gen-

Baking soda tips: Sprinkle baking soda on the carpet and then Hoover it up

tly work the stain away with the rough side of the sponge.

**Oven and microwave**

Ovens and microwaves collect stubborn grime all the time, so they can be

after they start to foam and clean away the grime with a sponge and water.

**Fridge**

Fridges can often become smelly and baking soda is the perfect remedy.

Baking soda tips: Pour some down the drain and vinegar after it

a real pain to clean. Take the racks and trays out of the oven and the turntable from the microwave. Mix up a bowl of baking soda with water or white vinegar to make a paste. Spread the paste on the walls of the oven and microwave making sure to avoid the heating elements, then leave it overnight.

Wipe the walls with a damp cloth to get rid of the bicarbonate of soda and then spray white vinegar on them. You'll notice the mixture start to foam and fizz and then you can wipe it away with a damp cloth.

Sprinkle the racks with bicarbonate of soda and then spray again with vinegar.

Soak them in hot water

Leave an open box of baking soda in the back of your fridge overnight or for even longer. Baking soda will absorb and neutralize any odours in the fridge.

**Dishes and pans**

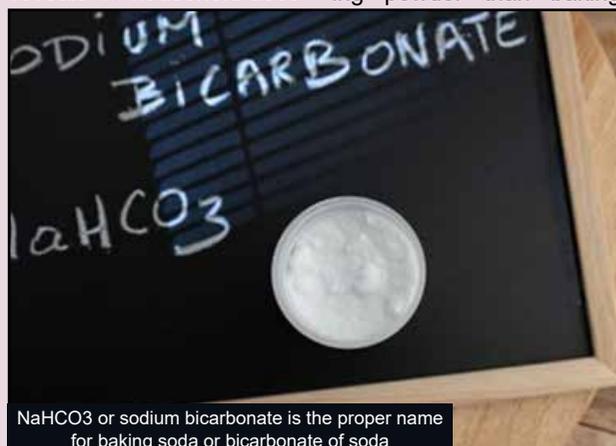

Sometimes dishes and pans are too difficult to clean and you can never really get them perfectly gunk-free. Add a couple of tablespoons of baking soda and washing up liquid to the pan in question and fill it with warm water. Leave it to soak for a little while and then scrub the pan with a damp sponge coated in baking soda.

We use sponges to clean things all over our houses, so it's no wonder they absolutely stink sometimes. Instead of constantly throwing away and buying new sponges, you can clean your existing ones with baking soda.

Soak the sponge in a sink or bucket full of about a litre of water and at least four tablespoons of baking soda. Leave it to sit for a while and then let it dry naturally- it should no longer smell.

Baking soda tips: Sprinkle baking soda on the carpet and then Hoover it up

NaHCO<sub>3</sub> or sodium bicarbonate is the proper name for baking soda or bicarbonate of soda

# What's the difference between a Physiotherapist, a Chiropractor and an Osteopath?

To the average person, an osteopath, a physiotherapist, and a chiropractor may seem like more or less the same job. All deal with musculoskeletal pain, require a university degree, and certification from an accredited course.

While they may seem similar at a glance, the three professions take very different approaches to health, so it is important to understand what sets each one apart from the others before deciding which of these professionals is best for you.

## Physiotherapist

Probably the most well-known of the three job titles, it is worth starting off by drawing a distinction between a physiotherapist and the similar-but-distinct title of physical therapist. While both can be legitimate careers, it is important to know that only physiotherapists require a university degree, while physical therapists receive a narrower range of training over a shorter period of time.

In comparison to osteopaths and chiropractors, one of the primary distinctions of physiotherapy is its use of an all-encompassing approach that looks beyond the purely physical elements of an issue, also taking both psychological and social factors into account when treating patients. This means that if a patient were to present themselves to a physiotherapist complaining of

back pain, rather than simply identifying the problem area and treating the symptoms, a physiotherapist will attempt to identify why the problem manifested in the first place, and prevent it from recurring in the future. This means looking at the physical side of things, such as posture and movement patterns, as well as psychological aspects such as stress or anxiety, and social factors such as work habits and hobbies.

## Chiropractor

Of the three job titles, chiropractors are definitely the most commonly associated with back problems, although some claim it can help with issues such as asthma or sexual dysfunction. But at the same

time, chiropractors are also among the most controversial in medical circles. The main feature of chiropractic treatment that sets it apart from physiotherapy and osteopathy is its focus on manipulation, which is when joints are pushed and pulled to their farthest possible range of motion. The belief is that physical pain can be resolved by getting a chiropractor to manually put everything "back in the right place".

Chiropractors are some-

disrupting the nerves along the spine, but this has never been shown to actually exist, meaning their attempts to treat it for both back pain and organ problems is viewed by many as not only ineffective, but meaningless and irresponsible.

## Osteopath

Osteopaths are quite similar to chiropractors in that they also place a lot of importance on manual manipulation, although they

Many see it as harmless, or even beneficial when combined with other medical treatment. However, some studies have shown osteopathy to be ineffective in achieving its claims, while others show evidence to support it. The general consensus is that while osteopathy may have science to back up some of its claims, other claims are simply not true, and further research is needed to separate fact from fiction.

Although these jobs may seem similar, and usually have similar goals, it is clear to see that there is a distinct difference between physiotherapists, chiropractors, and osteopaths. To the average person, these titles may appear interchangeable, but many people will make a different choice when presented with the facts.

While there is a clear frontrunner from a scientific perspective, the key takeaway here should not be to learn the technical difference between these roles, but to realise the importance of researching medical professionals before seeing them. Only then can you make a truly informed decision.

what controversial for a number of reasons. Firstly, their techniques are seen as unnecessarily risky, with chiropractors having some of the highest instances of adverse patient reactions. They are also looked down upon from a scientific perspective, with one of their main theories having no evidence to even support its existence. "Chiropractic subluxation" is claimed to cause organ problems by

tend to be a lot more gentle. The prevailing theory of osteopathy is that the body is at its best when all of its tissues are moving how they are supposed to. Osteopaths therefore assess a patient's health by feeling their tissues, and attempting to stimulate movement where they believe it is lacking.

As osteopathic manipulation is so much more gentle than chiropractic manipula-

By Sophia Smith Galer

The oft-maligned, most downloaded app of the year changed comedy, music and activism – its success is a refreshing revolution for meritocratic self-expression, writes Sophia Smith-Galer.

## How TikTok changed the world in 2020

With stories about an algorithm that suppressed "ugly and poor creators" and President Donald Trump considering a US

ban, TikTok was at once the most beguiling and maligned app of the year. The first major social media app to be run beyond

the purview of Silicon Valley, the Chinese-owned platform joined the likes of WhatsApp, Instagram and Twitter in the social media diets of many, despite a multitude of controversies. It popularised short-form video and developed a recommendation algorithm that made it one of the world's strongest video competitors. But while the grown-ups were busy trying to work out the implications of national security threats from the Chinese Communist Party and a bifurcated US/China internet, teenagers were nurturing the most powerful tool they had ever seen. Now, at the end of 2020, TikTok is the most downloaded app of the year – and it's changed an awful lot more than just how we consume media online.

I am technically too old for TikTok, sitting just outside its core 13-24-year-old market. But spiritually, I am just right. Just as being a boomer isn't necessarily about belonging to an age demographic, but a

rather a mindset, there's no age threshold for TikTok; it's more a willingness to hurl yourself into the chaos of the internet. Encountering somebody online that you relate to before following them religiously, DM-ing them and inundating them with supportive comments and queries whenever they post is distinctly Zoomer (Gen Z) culture. Asking questions, supporting worthy initiatives and mass-protesting in an app space is something that comes naturally to these digital natives. Following on from the era of the YouTube wormhole, TikTok's algorithm recommends you the content you subconsciously crave – but unlike YouTube, these videos are under a minute long. That means that in one session, you could consume reams and reams of engaging videos – familiarising yourself with creators, trends and communities in the process. There is a space for everyone on there – the good, the bad and the plain

bizarre.

Having a substantial following on TikTok translates to a strange sort of celebrity in 2020; I only have 140,000 followers, which is pretty small in the grand scheme of the internet, yet I now can't go a fortnight without being recognised in the street. I'd love to be able to say that my scintillating journalism used to deliver me the same effect, but the fact that anyone knows my face is testament to how well TikTok has had people glued to their screens this year. It came from being myself – and that's consistently what other creators say too. The ordinary folk who have become known faces have hastened in a new era of content creator; gone are the pastel pink hyper-edits and Photoshopped goddesses of the Instagram yesteryear. TikTok may have managed to draft in celebrities like chef Gordon Ramsay, but users flood the app to see distinctly ordinary and relatable individuals. If Instagram gave us the IG model, Tik-

Tok's given us our talented next-door neighbour, and with the help of its algorithm, here is how these characters changed 2020 – and could well change the years to come.

## A new era of digital activism

History will probably come to remember TikTok as having a prominent role in Black Lives Matter, promoting it as a trend on its Discover page and winning the hashtag more than 23 billion views. Kareem Rahma posting scenes in Minneapolis to the tune of Post Malone's remix of Childish Gambino's This Is America became a key cultural moment for young users desperate for change in the US and beyond.

Few will remember that in the first few days following George Floyd's death, the #GeorgeFloyd and #BlackLivesMatter pages had 0 views due to a "technical glitch". A year

Cont. on Page 34

Probably the most common reason for a car breaking down - or its failure to start - is because of the battery. In the UK people normally associate this with cold, damp weather but the reverse is opposite here in Tenerife. Extreme heat and the dryness mean that a battery can "give up" without any notice - quite surprising to some people, although it is very common. Many people will happily head off to a shopping centre, visiting friends, or just

sightseeing and, on returning to their vehicle 15 mins, an hour or several hours later, the car will not start. Panic then sets in as people cannot understand this, as there has quite possibly been no indication of the battery's deterioration. It is also true that batteries in Spain don't seem to last as long as they would in colder conditions

If you have 'grua' cover with your Insurance, which most Motor Vehicle policies do these days, you simply have

to a Grua who will come out and quite often 'jump start' your vehicle.

You should then head immediately to your garage and ask them to check the battery for you. This involves a simple test to see what voltage the battery is showing. If the reading is bad a new battery is normally necessary and a correct replacement fitted. If you are unsure and have gone to a petrol station (where you will often pay far more there than at your local garage) the staff will help you to select the correct one, although it is always better to go to the garage or mechanic that you know and trust.

It is also a good idea to carry a set of jump leads which can be bought from any large car accesso-

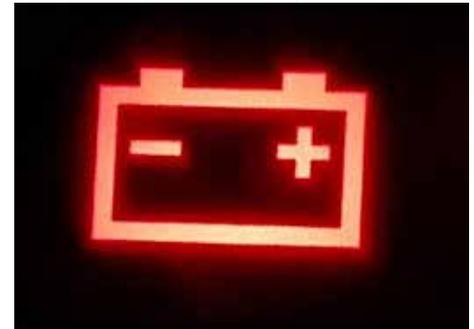

ry store or at Al Campo, Carrefour and in larger Hiperdino or Hipertrebol branches. If you are carrying a set of jump leads, you will often find a helpful motorist who will assist you in giving a jump start (especially true if you are a woman alone or have children in the car with you). Remember that when leaving your vehicle, you must put on your hi-vis jackets and wait in a safe place nearby. You should always place your warning triangles at the front and rear of the car to alert oncoming motorists (these triangles are soon going to be changed to require flashing lights to be placed on the roof of the vehicle).

Of course, a battery is by no means the only reason a car does not start but is by far

the most common. With many of more modern cars there is a battery warning light indicators which warn you when the battery is low - always take head of any warning lights that appear on your dash-

board and act accordingly. We wish you a safe and Happy 2021!

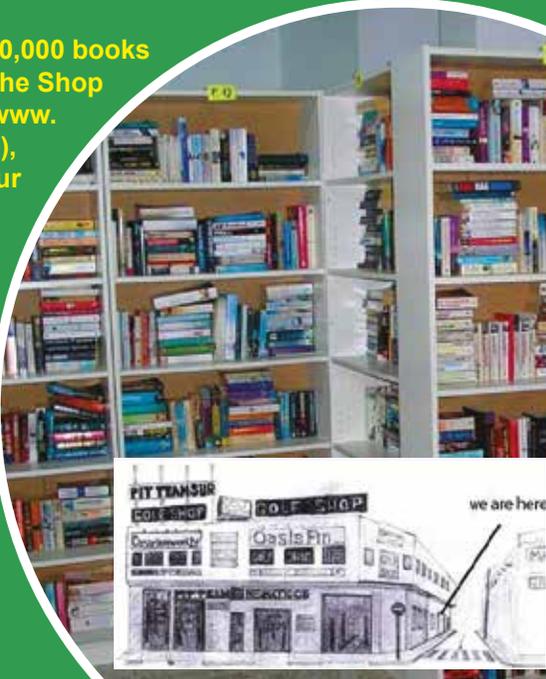

**NOW ONLINE!**  
www.laschafirasbookshop.com

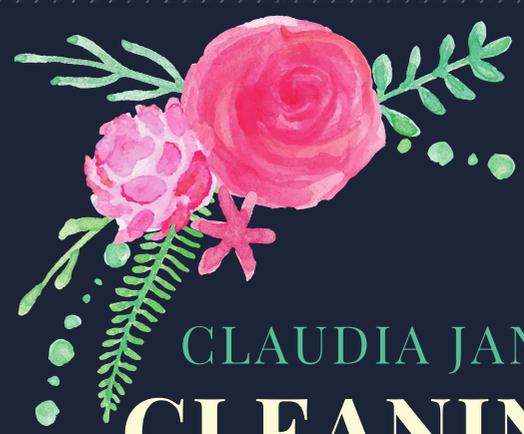

# LAS CHAFIRAS BOOK SHOP

The Bookshop is located at Calle Luciano Bello Alfonso No 5 in Las Chafiras (behind and above Pit Team Sur and the Golf Shop, and opposite Marrero Homes). Books cost just €3.00 but we offer a 'Buy two get one FREE' system and we buy books we don't have for 50 cents each.

We now have more than 10,000 books to choose from, either in the Shop itself, or via the internet (www.laschafirasbookshop.com), where you can 'browse' our inventory and order - we will be happy to deliver to anyone not able to get in.

Should you come to the shop and no one is in, just call us on either 609 714 276 or 627 230 360 - we're never very far away and will get back as fast as we can - while you have a coffee at one of the many cafés nearby!

Cont. from Page 32

Kareem Rahma's TikToks of scenes in Minneapolis were a key cultural moment for users around the world

before, The Intercept had found evidence that non-white, disabled and poor creators were possibly being suppressed on the algorithm by moderators. But for many, the platform has started to feel like a different place recently, with more diverse creators appearing on the For You Page and more initiatives promoting inclusivity.

It also became a promi-

also forced his campaign to reset the Trump app's rat-

ing after TikTokers trolled it with bad reviews. In the summer of this year, I made a film about how algorithmic activism – the way users comment, like, share and rewatch videos to boost it on the TikTok algorithm – has been an important way for locked down social activists to mobilise when they can't leave the house.

TikTok absurdism has

scroll straight past it. There are now common TikTok tropes that viewers instantly respond to; don a tea towel on your head for example and you're instantly a woman. Put on a blonde wig, sunglasses and a baseball cap and you're suddenly a "Karen".

"When it comes to comedy, TikTok essentially kills the punchline," says Baron Ryan, who has more than 700k followers from his TikTok sketches. "That's not a bad thing, it's just different." A lot of the comedy on there is absurdist which, though it performs well in mainstream media too, can take on a life of its own on a platform that delights in oddness. "Pacing is quicker now and details are becoming a bigger deal. You leave an Easter egg for half a second in one shot, and the audience will almost always catch it. This is because watching content in your hands, by yourself is an extremely intimate experience TV cannot replace."

For Ryan it isn't just about the quality of your content but your behaviour as an individual. He references @kallmekris, a creator who's created several loveable return characters including a taxing toddler: "While hilarious in her own right, [she] is incredibly likeable. She's gracious with her fans, she works clean, doesn't roast or criticise anybody with her comedy, and that is why she has over 10 million followers."

He sees TikTok as hav-

where there often isn't much to laugh about – and plenty of existential dread – it's of little surprise a Gen Z app has taken to artists like Ryan so readily.

**The year meme culture went 3D – for good**

We no longer live in a 2D meme world of Pepe the Frog, the boyfriend checking out another woman and that man with the weird crinkly face laughing at things. The realm of visual online artistry now not only demands PhotoShop, but video editing skills. Many argue that Vine did this first, but the caveat here is that Vine died while TikTok, which was the fastest app in the history of social media to reach a billion user downloads, isn't going anywhere. Creators like Robert Tolppi have sent eerie, bad 3D renderings viral on DeepTok [Deep TikTok], the TikTok community known for promulgating a number of bizarre videos, the comments sections of which users gather in to revel in their internet weirdness. This is the year that the internet got "deepfried": a phrase that refers to the use of deliberate glitches and creepy voice deepening effects that turned TikTok feeds into a sort of Orwellian doomscape. But for fun. Given how much the rest of the world felt like it was turning into an actual Orwellian doomscape, it makes sense that kids would want to create their own one, within their control, and within which they could connect. Many of the deep-fried videos failed to reach virality outside of the app unlike many other TikToks this year, suggesting that the odder niches of meme culture only work when partnered with TikTok's mysterious algorithm, much like how others only work in certain groups or subreddits.

A new way for independent musicians to go viral

The promotion of trends on TikTok has gone hand in hand with its creation of the audio meme; the mass reproduction of the same sound to all of these magical trends. Sometimes the sounds are from well-known artists, some of whom deliberately court marketing on the platform, which is exactly what Drake did with Toosie Slide. But what has been a distinct component of TikTok cul-

Baron Ryan is a comedian who has more than 700k followers from his TikTok sketches

ture this year has been the virality of unknown singers and artists who've been lifted from obscurity to views and listens in their millions.

One of the most moving examples of this came from Lyn Lapid, who made a TikTok about a disappointing experience she had with a producer when she was first trying to get her music out. "He said come here sweetie, I can make you a star/I just want to see you flourish and I know you'll make it far/What she couldn't see is that he was in it for the money" she sings as she taps her table percussively. It's been seen a mind-boggling 50 million times and now the 18-year-old has released it as a single – presumably free from said money-grabbing producer. A little like Birdy, who first got big on YouTube, the music that goes really viral from the lesser-known artists always tends to be deft, heartfelt and distinctly indie.

"Traditional media doesn't have the crazy global reach that TikTok creates," says Will Joseph Cook, who went viral on the platform lately with his song Be Around Me. He launched it independently and now enjoys a following of over 200k. "Now I'm finally reaching indie fans in South East Asia that would have a much harder time meeting me otherwise. On a more personal note I feel like it's a space where art-

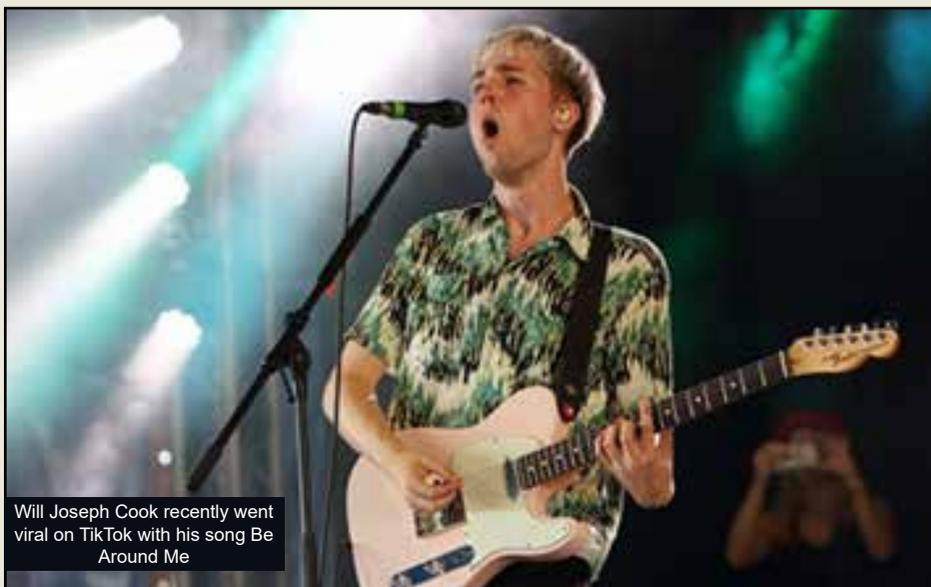

ists can show their other interests and sense of humour in a really fun way. I've enjoyed that part of it a lot."

Cook caveats that it's not for everyone. "There's quite a bold internet culture on TikTok; you kind of have to be a consumer of the content to be a good creator. It can feel really forced when an artist who doesn't use the app rocks up and tries to force a viral audio."

**A new age of collaborative art**

TikTokers have written a musical together based on Pixar's Ratatouille. This is not a joke, and this is also, unfathomably, not ridiculous – it's actually now been screened offline at a theatre event in Broadway. People with proper musical knowledge and training have written chorus numbers and moving solos, and TikTok's product design encourages duets, which has made it a perfect tool to harmonise and co-write music with complete strangers. This is a solo song written for Chef Skinner – I Knew I Smelled A Rat – and this moving montage video shows how many people have sent in dance routines, costume designs, artwork, actors, make up artwork and even a backstage crew in

Cont. on Page 36

Cont. from Page 34

what's been a truly organic piece of collaborative musical work. In a pandemic where there have been so many initiatives that try to bring together performers on Zoom, the Ratatouille musical sits as something proudly internet-first. I'm sure that brands soon will try to overwhelm TikTok with similar ideas – but until that happens, Remy the rat will remain “the rat of all our dreams”.

### We all became content creators

YouTube turned many people into content creators through their computers – and now TikTok is turning even more people into content creators via their phones. YouTubers have to shoot with editing for the platform in mind – but TikTokers whip their phone out often on-the-go

or in a spare moment at home, film and edit in app and then instantly upload. This is colour-by-numbers content creation – you're offered up trends either in the For You Page or the Discover page and you can start making videos straight away. The burden of making it look like a videographer shot it disappears – as does the pressure of having to come up with content ideas.

For so many internet lurkers, the pre-TikTok world was divided between influencers and normies; your Instagram brunch might have had the picture-perfect fried egg and smashed avo, but it was never going to reach the viral counts of a Kardashian. But with an app like TikTok, your funny video has as much chance of going around the world as the next person's, whether they have 0 followers or 100,000. The sheer internet chaos which that can bring isn't always posi-

tive, but there is something delightfully meritocratic about it.

The rise of TikTok this year made many of us consider two powerful things; the merits of joystrolling on the internet to escape from reality but crucially, also, the question of who really controls what we say and see online. Having a Chinese-owned app thrown into the melee of Silicon Valley social media may have prompted a great deal of politicised, anti-Chinese xenophobia, but it also kindled some much-needed awareness amongst internet users about who could have access to their data and who could be prioritising or suppressing the content that they see on their feeds. TikTok has, for now, not been found to be a data danger – and its increasing ubiquity in so many lives has already made it a mainstay. If the algorithm remains as it currently is, 2021 could

see an enormous wave of life-altering, mind-changing content coming your way. Self-expression will become synonymous with content creation, favouring those who know how to film themselves. Whether that's a good or bad thing for the world is up for debate – but for those who have long felt ostracised or disenfranchised by the traditional holders of power, the meritocratic video fame of the 2020s will define a new era of David beating Goliath. While platforms like Instagram increasingly become arenas where only the biggest brands with their marketing budgets get any screen time at the expense of newer, smaller talent, TikTokers with powerful messages – for now – are free to run amok, defiant in their power to take on the algorithm, the internet and the world beyond.

Ordinary people – like journalist Sophia Smith-Galer – have as much chance as the next person at going viral

## Why the ‘paradox mindset’ is the key to success

By Loizos Heracleous and David Robson, BBC Worklife

Although paradoxes often trip us up, embracing contradictory ideas may actually be the secret to creativity and leadership.

Working life often involves the push and pull of various contradictory demands. Doctors and nurses need to provide highest quality healthcare at the lowest cost; musicians want to maintain their artistic integrity while also making a sack full of cash. A teacher has to impose tough discipline for the good of the class – being “cruel to be kind”.

Being dragged in two different directions, simultaneously, should only create tension and stress. And yet some exciting and highly counter-intuitive research suggests that these conflicts can often work in our favour. Over a series

of studies, psychologists and organisational scientists have found that people who learn to embrace, rather than reject, opposing demands show greater creativity, flexibility and productivity. The dual constraints actually enhance their performance.

The researchers call this a “paradox mindset” – and there never be a better time to start cultivating it.

### Think like Einstein

Although this concept may sound counter-intuitive, it is inspired by a long history of research showing that contemplation of apparent contradictions can

break down our assumptions, offering us wholly new ways of looking at the problem.

Harvard University psychiatrist Albert Rothenberg was among the first to investigate the idea formally, with a study in 1996 of acclaimed geniuses. Interviewing 22 Nobel laureates, and analysing historical accounts of deceased world-changing scientists, he noted that each revolutionary thinker had spent considerable time “actively conceiving multiple opposites or antitheses simultaneously”.

Einstein, for instance, contemplated how an object could be both at rest

and moving depending on the position of the observer, a consideration that ultimately led to his relativity theory. Danish physicist Niels Bohr tried to reconcile the ways that energy acted like both waves and particles: states that existed simultaneously, even though they could not be observed together. This train of thought ultimately inspired a startling new understanding of quantum mechanics.

Besides these scientists, Rothenberg has examined the biographies of many award-winning writers, showing that their creativity is also often sparked by the contemplation of irreconcilable ideas. Take the playwright Eugene O'Neill. Rothenberg points out that the drama of *The Iceman Cometh* grew from the character Hickey's contradictory desires for his wife to be both faithful and unfaithful to him – at the same time.

### The power of conflict

Most of us do not have Einstein or O'Neill's genius, of course, but a series of studies have shown that “paradoxical cognition” can also help more average thinkers to solve everyday problems, and organisations to enhance their performance.

In one of the early studies, Ella Miron-Spektor, associate professor of or-

ganisational behaviour at INSEAD, and her research collaborators asked participants to write down three paradoxical statements. This, the participants were told, could be as banal as the idea that “sitting can be more tiring than walking”; they simply had to list any thoughts that were “seemingly contradictory but nonetheless possibly true”. She then gave them two of psychology's standard tests of creativity.

The first was the “remote association test”, which requires participants to find a common word that links three different alternatives. What links “sore, shoulder, sweat”, for example? The answer is cold – and if you get it right, you've been able to spot the hidden connections between diverse ideas, which is considered essential for many forms of creative thinking.

The second was the so-called “candle problem”. Participants were shown a picture containing several objects on a table: a candle, a pack of matches and a box of tacks, all of which were next to a cardboard wall. They were then given three minutes to work out how to attach the candle to the wall so that the candle burns properly but does not drip wax on the table or the floor – using only the materials provided. The accepted answer is to empty the

box, place the candle inside and then tack the box to the wall. But the majority of participants fail to consider that the box itself could be a useful material, leaving them completely stumped for a solution.

Miron-Spektor found that the participants who had been asked to consider the paradoxical statements tended to perform much better on both tasks, compared to a control group who had simply noted down three “interesting” statements. Thirty-five percent of the paradoxical thinkers found the correct solution to the candle problem, for example, compared with just 21% of the control group – a large difference after such a simple prime.

Although the participants' paradoxical statements were not directly related to the task itself, their contemplation of the contradictory ideas seemed to have freed their thinking from its usual constraints, meaning that they were better able to think “outside the box” (or, in this case, inside it).

In the same paper, Miron-Spektor demonstrated that this also occurs when we consider the apparently paradoxical goals found in many jobs. People who were asked to reflect on the dual (and apparently

# ENERGY PERFORMANCE CERTIFICATES IN SPAIN

## JANUARY 2021 UPDATE

Leaving behind 2020 and a full 7 years and 7 months since the legal requirement was put in place for Energy Performance Certificates to be carried out, the Canarian Government's official register shows that approximately 249,516 certificates have now been registered. Thus, 1,751 more residential and commercial properties have been inspected and

issued their certificate in the month of December. With the average number of certificates registered each month running at 1,729 the year of 2020 has seen a decline of 24% since 2019 and 28% since 2018. Of course, these figures hide the fact that some properties being sold or rented again already have a valid certificate. Now all there is to do is to see what 2021 has in

store! For those of you who are not aware of Energy Performance Certificates (EPCs), they were introduced in Spain and its dependencies by Royal Decree on 5th April 2013. This Law requires that, from 1st June 2013, an EPC must be obtained by the owner whenever a domestic or commercial property is Built, Sold or Rented.

### Selling your property

From 1st July 2013 property owners are required by law to present an Energy Performance Certificate when a property is placed on the market and prior to any advertising. When the property is sold, the Notary will need to see the EPC, termed the Certificado de Eficiencia Energética in Spain.

### Renting your property

Either you or your agent, must obtain an EPC. An agent will not be legally allowed to offer or advertise your property for long term letting without one. Where a property has already been let prior to 1st July 2013, no EPC is required until one tenant leaves and the property is offered for long term rental again. If your property was built after 2007 you should already have an

EPC provided by the seller. If you only rent your property out on a short term basis, for less than 4 months of each year, you may not need to have an EPC. If you are the tenant your landlord or the letting agent should be able to show you the EPC for your property.

### The EPC contains:

Information about a property's energy use and typical energy costs, and recommendations as to how you may be able to reduce energy use and save money. An EPC allocates an Energy Efficiency Rating, ranging from 'A' (most efficient) to 'G' (least efficient). The

Certificate, registered with the Canarian Government is valid for 10 years.

### How to arrange an EPC:

If you are selling or renting out property, you will need to engage an Accredited Assessor, who will visit your property to inspect and then produce and register your properties Energy Performance Certificate.

*If you have any questions, or wish to arrange for me, Philip Wright, to carry out your energy Performance Certificate please call me on 667 757 323.*

## DOG OF THE MONTH

# BLACKIE

**Blackie** came to the Refuge as a puppy 3 years ago and has been there ever since. He is beginning to lose hope and seems to be becoming very sad. He would be a great family pet - he loves children and to play. It really breaks

our hearts to see such a young dog so depressed. Could YOU be the one to change the future for this lovely boy?

The Centro de Proteccion Animal de Tierra Blanca is located off Junction 15 of the TF-1 by the restaurant

Los Chasneros, just 200 metres above the TF-1. They don't ask for adoption fees, only a donation of food and some photos to let them know how your new pet is getting on in his/her new home.

Cont. from Page 36

opposing) requirements of minimising costs and maximising innovation were subsequently more creative than those who only

manufacturer. The research team suspected that the answer would depend on an employee's abilities and attitudes, and so they first designed a questionnaire to measure the "paradox

be true. The participants were also asked to describe how often they experienced "resource scarcity" at work (the need to perform highly under limited time or financial resources). Their su-

performance actually increased under the tension, so that they came up with new and better solutions to the problems within their role. Those without the paradox mindset, in contrast, tended to crumble, and struggled to maintain their performance when resources were scarce.

sign innovation and quality, but few are aware of the extreme efficiency of its operations. These combined goals have enabled Apple to be the most valuable company in the world at a market capitalisation of nearly US\$2tn (£1.54tn).

er than seeing the potential conflicts as something to avoid, you can begin to view the competing demands as an opportunity for growth and a source of motivation. (And if there aren't any external pressures, you could create your own – asking, for instance, how you could increase the efficiency and accuracy of your performance on a particular task, if only for an exercise in paradoxical thinking.) There may be no immediate solution, but the very act of thinking about the possibility of reconciling those issues could still lubricate your mind for great-

**Creative sparks**

How can we capitalise on this knowledge? One obvious step, inspired by Miron-Spektor's early study, would be to simply note down any paradoxes you encounter – and to make a point of contemplating them before you set about solving problems. If you are stuck for ideas, you could look further into

In a corporate environment, embracing paradoxes may spark creativity, efficiency and innovation, though it may seem counter-intuitive to do so

considered one goal or the other: somehow, the contradictory demands fuelled their thinking.

**The paradox mindset**

A more recent study, published by Miron-Spektor and colleagues in 2017, has examined the benefits of paradoxical cognition in the real workplace of a large consumer-products

mindset". The participants were first asked to rate statements about their willingness to embrace contradictions, such as:

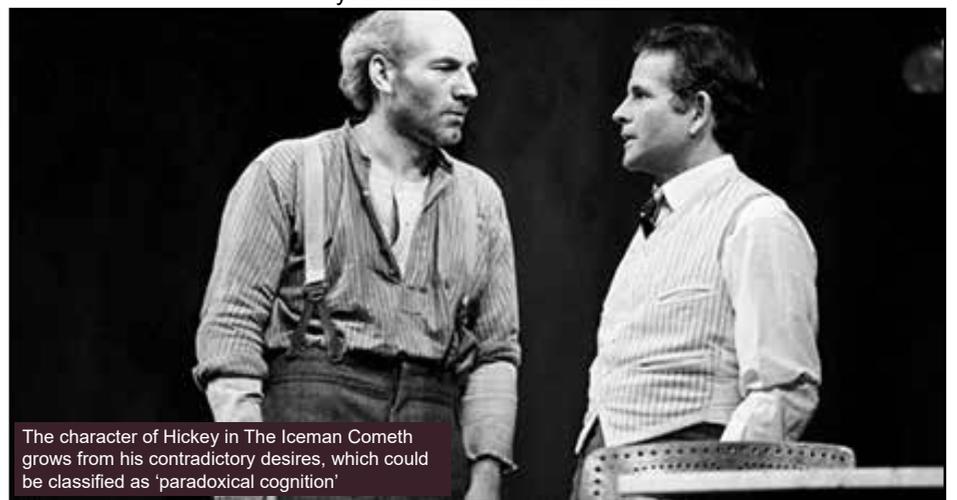

- When I consider conflicting perspectives, I gain a better understanding of an issue
- I am comfortable working on tasks that contradict each other
- I feel uplifted when I realise that two opposites can

pervisors, meanwhile, had to rate their performance and innovation within the role.

Sure enough, the study found that the employee's paradox mindset had a large influence on their ability to cope with the demands. For the people who scored highly, the challenge of dealing with limited resources was energising and inspiring, and their

These discoveries may be especially important for leaders, with evidence that a manager's paradox mindset influences the innovation of their whole team. Companies and institutions that embrace paradoxical strategies tend to outperform their competitors.

Studies of the Toyota Motor Corporation have

The character of Hickey in The Iceman Cometh grows from his contradictory desires, which could be classified as 'paradoxical cognition'

found that certain paradoxes are rife in its corporate culture, including the dual goals of maintaining stability while also encouraging constant reform. (As the former chairperson Hiroshi Okuda put it, "Reform business when business is good.") This has resulted in an extremely efficient, lean production system that others try to emulate. It is also consistently ranked as one of the most reliable brands, and has the highest revenues of any carmaker in the world. Apple, meanwhile, is well known for de-

the paradoxes that inspired scientists like Einstein and Bohr. Greek philosophy is also full of paradoxical ideas that might get your creative juices flowing.

Your own job may already contain many contradictory goals that could inspire paradoxical cognition. In the past, you might have assumed that you need to sacrifice one for the other – but if you want to cultivate the paradox mindset, you might spend a bit more time considering the ways you can pursue them both, simultaneously. Rath-

er innovation elsewhere.

The prospect of deliberately embracing competing demands may sound arduous, but Chinese researchers have recently shown that people with this mindset also get greater satisfaction from their role. There is an enjoyment, apparently, in reconciling two opposing goals – provided you have the right mindset.

Boosting your innovation and success, while also having more fun at work? There's a paradox that's certainly worth embracing.

Research has shown that people who take the time to consider paradoxical statements actually end up being better problem solvers

# 5 SIMPLE WAYS TO INCREASE YOUR WILLPOWER

from The Power of Positivity

While it may seem like a drag to go to the gym or eat healthy all the time, you can increase your willpower gradually with repetitive action. The body only does what the mind tells it to do, so if you feed your brain with positivity, willpower will come naturally. However, in our world of instant

gratification, our minds can quickly become hijacked by advertisements and enticing products around us.

To strengthen our willpower, we must learn to tune out these messages and look inside ourselves for answers instead. While we should give in to our desires, sparingly, indulging

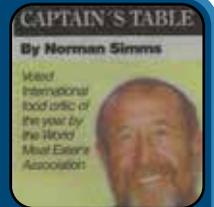

in them too often leads to weakened willpower. According to the American Psychological Association, willpower can become depleted from overuse or underuse, just like a muscle.

"Strength does not come from physical capacity. It

Cont. on Page 40

# The Captain's Table

## JANUARY 2021

To my many past readers and fans, it is wonderful to write my Captain's Table restaurant review again. I feel, after many requests, and in these very difficult times, we should

try to appreciate and support the many restaurants and bars that have opened under the most severe restrictions. Of course, many of you might ask: Where is open?

Or, Do we have to go to Mars? Now, every month, you will just need to read this column in The TPG through which we can once again read about (and visit!) the many great

eateries of our Island of Eternal Spring! If you are a restaurant owner in the South (or the North) and are open for business in these difficult times, I would be

pleased to hear from you and pay you a visit to perhaps share a bottle of wine while I tell my hundreds of readers what they are missing! If you would care to

contact me, I will organize myself to renew or discover your fine establishment. I hope to read about you one day soon in my monthly Captain's Table!

## Restaurant Calma - Balkan Cuisine

Anbody who comes from Russia or Eastern Europe will no doubt tell you that some of the most beautiful and treasured items to come from that part of the world were created by Fabergé. Well people, I am pleased to inform you that I had the great pleasure recently to enjoy a wonderful eastern

European experience. A new restaurant that in my opinion has the best menu and greatest view in Tenerife. This newly created restaurant can be found at No 5 Calle Alemania, C.C. Patio Canario, in Torviscas. The restaurant enjoys, in my opinion, the finest view of any restaurant I have visited. On top of this, the

food is sublime, so, if you have never tasted Balkan food, you are in for a wonderful treat! Enjoy fantastic dishes like Thatziki and shop-ska; salads from kyo-polou, urnebes, meligiano, lyutenitsa; sarma from typical Balkan appetizers; chevapchichi, plescavita souvlaki from BBQ; or moussaka and macaronada from the wide variety of main courses. They also have a range of delicious Balkan desserts, like baklava, banitsa or a delicious chocolate spread with cream cheese. Restaurant Calma is run by a charming lady - and maître d' - who will explain each dish perfectly and will make sure the service you receive throughout will be just

fabulous! For any readers not familiar with the tastes of eastern Europe, I must tell you that my meal was one of the most enjoyable I have ever had - so, if you like great food, beautiful restaurants, and magnificent views - don't dare miss this one! **The restaurant is open for lunch and evening meals against enchanting background music - to avoid disappointment, call 634 000 443 NOW!** My personal thoughts after having such a wonderful experience I am going to become a Cosack! Happy New Year! The Captain

Cont. from Page 38

comes from an indomitable will." – Mahatma Gandhi

### HERE ARE FIVE EASY WAYS TO INCREASE YOUR WILLPOWER:

#### 1 – MEDITATE

A lack of willpower means a lack of self-control. By giving in to all of our urges and desires, we don't get to practice delayed gratification. However, meditation helps us resist the ego's constant desires by helping us focus our attention and quiet our minds. A chaotic mind leads to a stressful, directionless life, but meditation can help you sift

through the chatter and access your potential.

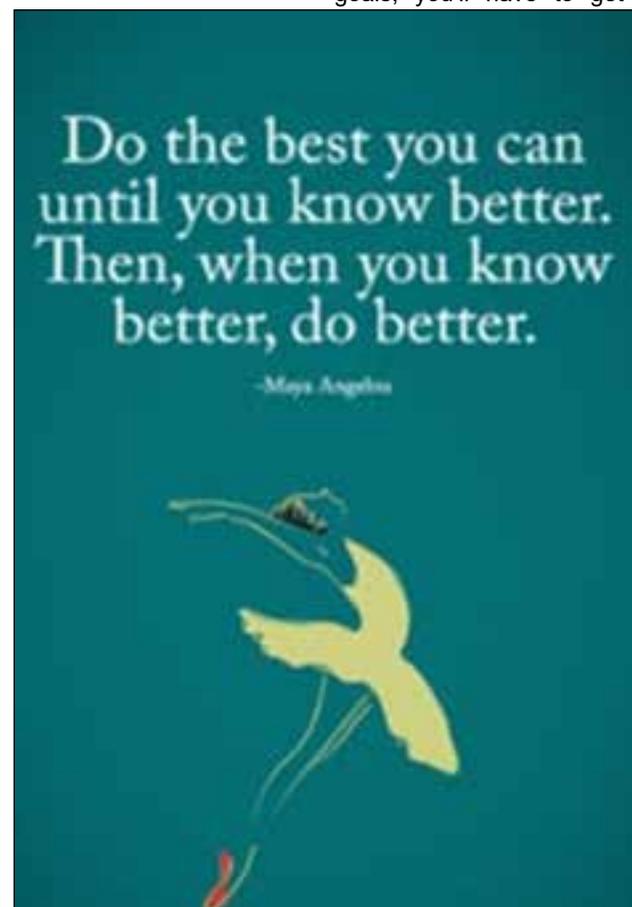

Studies show that regular long-term meditators have improved function in areas of the brain related to self-regulation and executive attention. In other words, they have bet-

ter control of their emotions and attention spans, both of which play a role in exercising willpower. If you have power over your feelings, you can more easily choose a healthy dinner over a fast-food meal, for example. Having a longer attention span means you can use your willpower to do complicated tasks, such as work out or stick to a business plan.

Meditation will seem unpleasant at first as your mind wanders, but just 10 minutes per day can make a huge difference. As you train your brain to focus for more extended periods, you will notice increased focus and more balanced emotions in your daily life.

#### 2 – GET OUT OF YOUR COMFORT ZONE BY CREATING GOALS

The comfort zone may seem cosy and safe, but nothing ever grows there. If you want to break the mould and achieve your goals, you'll have to get

comfortable with being uncomfortable. Pushing yourself every day in some type of way helps to increase your willpower. Remember – your mind will give out long before your body will. This truth applies to exercise, eating healthy, working on business plans, or anything else you desire.

This outcome doesn't mean you need to run a marathon or hike up Mount Everest, but you should set small goals for yourself, so you have something to work towards. This goal will help you exercise your willpower by utilizing self-control and delaying gratification.

Researchers found that by creating and meeting self-imposed deadlines, you can increase your willpower. To accomplish this, just pick a project that you've been putting off and set a deadline to complete it. In the study, the participants crossed some items off their to-do lists while also eating healthier, exercising more, and cutting back on cigarettes and alcohol.

#### 3 – KEEP TRACK OF YOUR FINANCES

Many of us have automatic deductions taken out for things we don't even remember we signed up for, such as credit monitoring programs or music subscriptions. While these may cost only a minimal amount each month, they can add up quickly. Researchers found that monitoring finances helped people improve their willpower.

By either writing down expenses or using budgeting apps to track spending, you can more easily see where your money goes each month. If you know that you spend \$500 a month on eating out, you may decide you want to cut back by buying more food from the grocery store, for example. If you're going to work on your willpower, your finances make a great place to start because many of us don't control our spending.

For example, after a long day of work, you might feel tempted to drive through McDonald's or order from a delivery service. However, doing this too often can drain your bank account and deplete willpower. No one feels like cooking after spending eight hours at work, but you will save money and have a health-

ier meal.

Tracking finances can also help you see how your emotions play a role in your spending. When you feel tired and stressed out, you may use food to cope, as we talked about in the example above. You might also go on shopping sprees when you feel sad or lonely, as many people use material items to deal with unpleasant emotions. By seeing your expenses in front of you, you'll get an idea of how you can cut back and utilize willpower to achieve financial goals.

#### 4 – KEEP SOMETHING TEMPTING WITH YOU

If you want to increase your willpower, carrying around something that tempts you will put you to the ultimate test. For example, if you're going to eat healthier, you could take a cookie or a couple of pieces of chocolate around with you at work or school. Researchers did a study where they gave participants a box of Cadbury's Milk Tray to carry with them for two days. They told them not to eat the chocolates and gave some of the participants instructions on coping strategies.

They found that the participants who successfully resisted temptations to eat the candy exercised better control in other areas of their lives as well.

After a few days of resisting, you could choose to eat the candy so that you don't deplete your willpower completely. This will help you to keep up your good habits while also remembering that everyone deserves a treat sometimes!

#### 5 – ANALYSE YOUR PATTERNS AND EMOTIONS

Many of us go through our lives on autopilot without really taking time to examine why we do the things we do. For example, if you get fast food several times a week after work, it starts to become a habit. Humans love routine and can get stuck in bad habits without even realising it. However, our choices have the power to either hurt or help us in the long run.

If you find yourself feeling generally unhappy and tired the majority of the time, you should analyse your habits. Do you eat healthy, exercise, maintain a regular sleep schedule,

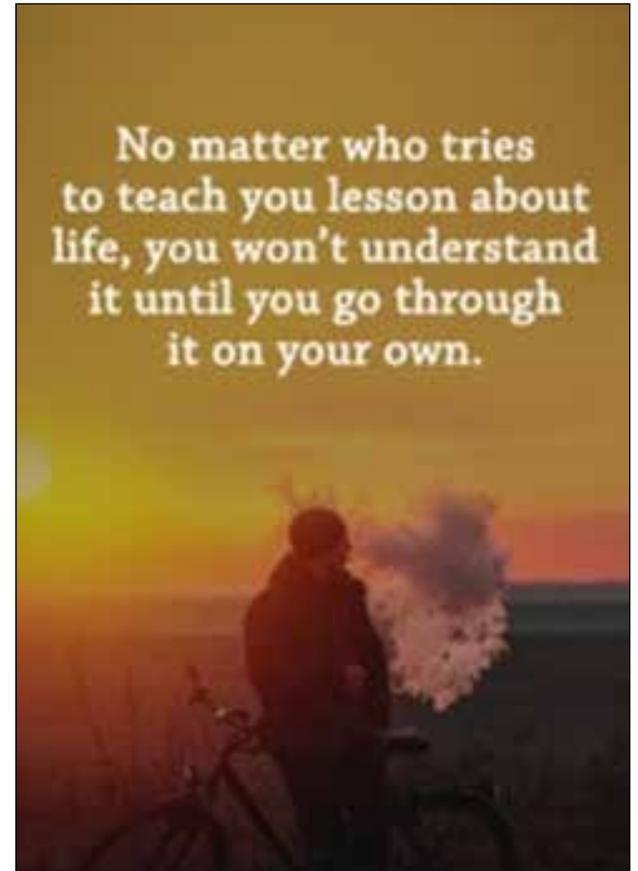

work on your goals, and engage in positive self-talk? If not, you can cultivate these habits over time. Many of us engage in self-destructive habits to quell negative emotions such as stress, loneliness, fatigue, boredom, or discontent.

However, the habits and choices we make to deal with our emotions can cause a lot of harm over time. If you want to increase your willpower, work on challenging your feelings instead of giving in

ing. Your body and mind will thank you for it.

#### FINAL THOUGHTS ABOUT HOW TO INCREASE YOUR WILLPOWER

In our world of endless temptations, having willpower seems almost impossible sometimes. However, just remember that you don't need all the items and foods that companies want to sell you. You don't need to open your Face-

to them.

#### HERE ARE SOME TIPS ON HOW TO DEAL WITH NEGATIVE EMOTIONS:

- Go for a nature walk. Spending time outdoors in the sunshine can boost our mood, help fight mental fatigue, and release feel-good hormones. Try to spend at least 20 minutes outside per day.

- Put down the technology. Speaking of willpower, using too much technology can destroy our self-control. We often reach for our phones or tablets in the morning without even realising it, and spend hours mindlessly scrolling through social media. Instead, meditate, do yoga, or stretch to begin your day.

- Nothing feels better than pushing yourself through that last quarter mile of your run or doing just one more deadlift in the gym. When you feel down or stressed out, increase your willpower by exercis-

book 80 times a day to check for updates. Watching that new show on Netflix could probably wait until you have crossed some items off your to-do list.

If you always give in to your desires, you won't give your willpower muscle a chance to exercise itself. Just like the muscles in your body, it takes work to maintain it. So, to increase your willpower, start small. Deny yourself treats when you want them, track your finances so you can see where you spend unnecessarily, and keep tabs on your emotions and behaviours. Many times, we act irrationally and don't even realize it.

Also, getting out of your comfort zone by setting realistic goals will help you boost your willpower. You'll feel empowered when you reach your goals and deny yourself cravings that only hinder your progress. Finally, meditate to increase your mental stamina and focus.

## HOW OUR VIEWS ON WORK HAVE CHANGED FOREVER

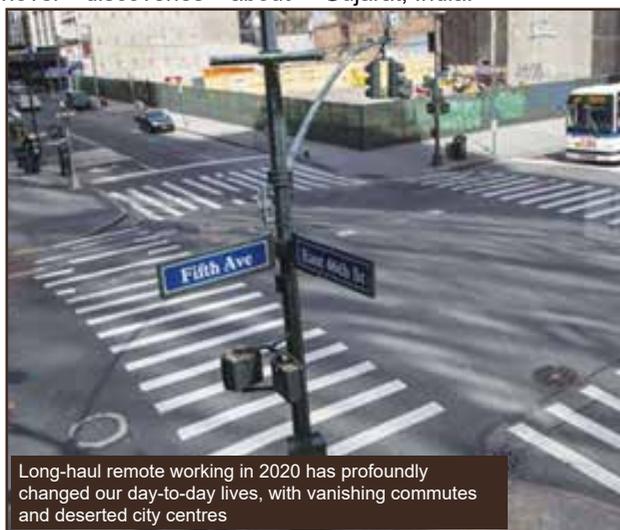

It's an understatement to say that the world of work as we knew it has been turned upside down. As we're physically working differently, we're changing where we sit down to do our jobs as well as making up new routines to get things done.

But the way we think about our jobs in general has also transformed.

Changes such as sitting around kitchen tables, sharing space with partners and children and being forced to focus in new environments have spurred novel discoveries about

the global workforce could work from home three-to-five days a week. It's unlikely that we're going back to the 'old' way of doing things any time soon.

Few things are clear in this pandemic, but if there's one thing that is: our relationship with our work lives will be permanently changed. BBC Worklife asked readers how these past months have changed their mindset toward their job or career. "The whole purpose of life changed. So [has] the purpose of work," says Bhagyesh Shah in Gujarat, India.

Long-haul remote working in 2020 has profoundly changed our day-to-day lives, with vanishing commutes and deserted city centres

our work lives. Many have found new success in unexpected places, expanded their skillset or improved productivity and wellbeing. Still, huge changes can also be challenging, like learning how to transition to unfamiliar technology, or questioning professional interests, values and career paths.

And, as new data shows that remote working will probably become the norm – researchers from McK-insey predict that 20% of

And some are thrilled to be in this new environment. "I have never been more happy and stress-free in my life," says Drake Bettis in Houston, Texas. "I have often said, 'It is insane for me to commute from one place with a computer to another place with a computer just for work,'" he adds.

Readers agree that remote work has enabled them to see their jobs as independent from their locations. "For me, [it] has

confirmed that many of the professions we have can be from anywhere," says Angela Lowe in Memphis, Tennessee. Some companies are beginning to agree; large employers such as Twitter and Facebook have announced 'forever' remote-work plans.

In Minnesota, US, the physical shift from being in office to working from home has been so enjoyable for Mariah L Sletten that it has made her realise how unfulfilling her job is. "At home, I feel more creative. I'm happier. I want to do great things. Try new ideas. Which makes my data-entry debt-collection job all the more heinous and intolerable, especially with everything else going on in the world at large... I'm not doing and getting paid for what I love, and it is absolutely dreadful."

This may explain why so many workers we heard from are trying to learn new skills and infuse more passion into their work. Richard Omondi, a camera operator and video editor in Kenya, says, "This pandemic has made me venture or try [to] learn new skills in digital marketing... and graphic design as well." In New Jersey, US, Amtul Syed is "absolutely loving the learning that is coming with this new work environment". Syed, a religious-studies teacher, has taken this time as an opportunity to think creatively for fun and interactive lessons. "I ended up learning so many new strategies from apps, online articles and YouTube."

It may also be the reason why some people are looking for new jobs altogether. Joseph Roberts, a CV analyst in Manchester, says his company's clients are using this time to reassess their jobs and values. "The thought of returning to the regular commute, continuing in the same monotonous position or sacrificing one's values and beliefs for the sake of money, are all common reasons for looking for new opportunities, or even a career change," he says.

And although it may seem that it's the wrong time to look for a new position, many sectors are still hiring. In the UK, the number of listings is still 70% of last year's average, according to a November report from the Office of National Statistics.

Paula Grady, a sales di-

rector from England, has experienced this first-hand, and has chosen to re-skill and start a new business. In Manchester, Conor Seager also changed paths by starting at a new company while working from home. "It was an unorthodox start, but the company showed faith in me by honouring the contract of employment, and were really supportive via Skype, phone calls, emails."

Of course, the new face of work doesn't come without its wrinkles. "Working from teams during the pandemic for the past nine months has been a learning

actually, can we do that? This is one of the most pressing questions for working parents of young children. Parents can be interrupted by their kids up to 15 times an hour. Of course, this can affect productivity – but also mental health and happiness.

"Working at home full-time with two young children, my main challenge has been in setting boundaries," says Anjeli Narine in Trinidad and Tobago. "Turns out neither four-year-olds nor clients are good at respecting boundaries. I am learning to move past 'mom guilt' and work-

wards work tremendously. I am now more aware of being agile, adaptable and pivoting into different skill sets and talents I was unaware ever existed for me," says Maya L Kellman in Barbados. "I am more challenged to ensure I have a healthy work/life balance by setting and respecting boundaries. More importantly, I have time [to] develop all my creative ideas, entrepreneurial ventures and further my education to diversify my personal brand."

As we all continue to adapt our working mindset

Many readers say balancing remote working with remote learning and caring for small children is a serious challenge that companies should address

curve," says Liana Dean-Wright in Alberta, Canada. "Pandemic fatigue' has set in, and folks seem less willing to engage in meaningful work and conversations, things have gone to feeling a bit hopeless at times."

Many have found themselves face-to-face with questions they didn't even know they had to ask. How will they bond with colleagues, especially young workers looking to network and build a solid foundation for a career? How will remote work deepen existing inequalities, especially for workers who can't work from home? And what of its effect on our mental health, and the people who might not thrive in a remote setting as much as others?

There's also the question of finding balance – in the new work world, how, ex-

aholism to unapologetically spend my time balancing these conflicting demands."

Kavita Ramnanan in Ontario echoes this. "I still find it very hard to find a 'cut off' time for work as it seems like I never really 'log off' when I am working from home. As far as my four-year-old is concerned, mom's workday is over once he gets home from school. He is right as it is outside business hours, but I'm still trying to find that balance of mom time and work time."

The challenges are major – but, on the other side, the rewards also may be. Many have found that learning to adapt and knowing when to reassess values and goals has led to more fulfilment – and even more balance.

"[The] pandemic has changed my mindset to-

to a quickly changing present and uncertain future, one thing is for sure: a lot is still unknown. But if we keep having discussions about all the changes, our brave new world of work could be easier to navigate than we think.

"The pandemic has made it crystal clear that we can't control our lives, yet there's a lot that we can do to make the most of it," says Loria Di Landri, a teacher in Lombardy, Italy. "Be open to change, don't be afraid of stepping out of your comfort zone, take up new challenges and give yourself a pep talk. To me working together and sharing knowledge, experience and doubts with my fellow teachers has helped me to grow, drive the change and look ahead."

Some companies, especially large tech firms like Microsoft, Twitter and Facebook, are offering remote working permanently to staff, even after the pandemic

# THE FOUR KEYS THAT COULD UNLOCK PROCRASTINATION

Imagine that you could become healthier, wealthier and less stressed through a few daily steps. It would require no great sacrifice on your part, but over the years, your personal and professional life would improve immeasurably in numerous ways.

For many people, procrastination is the major barrier that prevents positive change. Chronic procrastinators are less likely to be in permanent employment, and those with jobs have a vastly reduced income, earning at least \$14,000 less than their more proactive colleagues. Procrastinators also struggle to find time to exercise, since they will always put off physical activity for another day. And, thanks to the general chaos that arises from the constant dodging of important tasks, they tend to feel high levels of anxiety. The result is an elevated risk of chronic illnesses, including cardiovascular disease.

But it needn't be this way, according to cutting-edge research by Jason Wessel. As part of his PhD at Griffith University in Queensland, Australia, Wessel developed a system comprising four simple "reflection points" that target the psychological roots of the problem. Ask yourself these questions on a regular basis, and you'll find it far easier to resist tempting distractions, allowing you to focus on the things that

really matter in your life.

## Temporal Motivation Theory

Wessel's technique is inspired by Temporal Motivation Theory, which proposes four interlinked causes of procrastination.

The first is 'expectancy': we underestimate our chances of doing well at the task, which reduces our overall motivation. The second is our 'sensitivity to delay': many of us fail to properly recognise how badly our current delaying tactics will affect the chances of completing on time. Thirdly, we fail to appreciate the 'value' of the task and the benefits of getting it done on time, which means that we favour our immediate pleasure over long-term consequences. Finally, Wessel argues that we lack the basic 'metacognition' – the self-awareness and capacity to think analytically about our own thinking – which would allow us to identify the ways we might resist these behaviours and put ourselves back on track.

Studies of chronic procrastinators have provided some good evidence for Temporal Motivation Theory but potential antidotes to these problems have so far been woefully under-researched. "There just aren't many studies yet," says Wendelien van Eerde at the University of Amsterdam, who conducted a me-

ta-analysis of the available interventions in 2018.

In her study, van Eerde found that Cognitive Behavioural Therapy was the only existing method with reliable benefits. During CBT sessions, a professional therapist will help the client to talk through the thoughts, emotions and actions that are limiting their productivity. "You try to recognise what you are doing wrong, and adapt your behaviours to more functional ways of dealing with things," says van Eerde.

As effective as it may be, though, in-person CBT is relatively time consuming and expensive to deliver, making it hard to roll out en masse. This led Wessel to wonder whether it would be possible to offer a quicker and cheaper alternative. After careful consideration, he decided to distil the principles of Temporal Motivation Theory to four simple prompts that ask people to consider:

- How would someone successful complete the goal?
- How would you feel if you don't do the required task?
- What is the next immediate step you need to do?
- If you could do one thing to achieve the goal on time, what would it be?

The university environment provided the perfect environment to test the method. Wessel first recruited more than 100 undergraduates who were

Procrastination gets the best of all of us, to the detriment of our work, happiness and health. But a new theory could provide us with the easiest way to kick the habit.

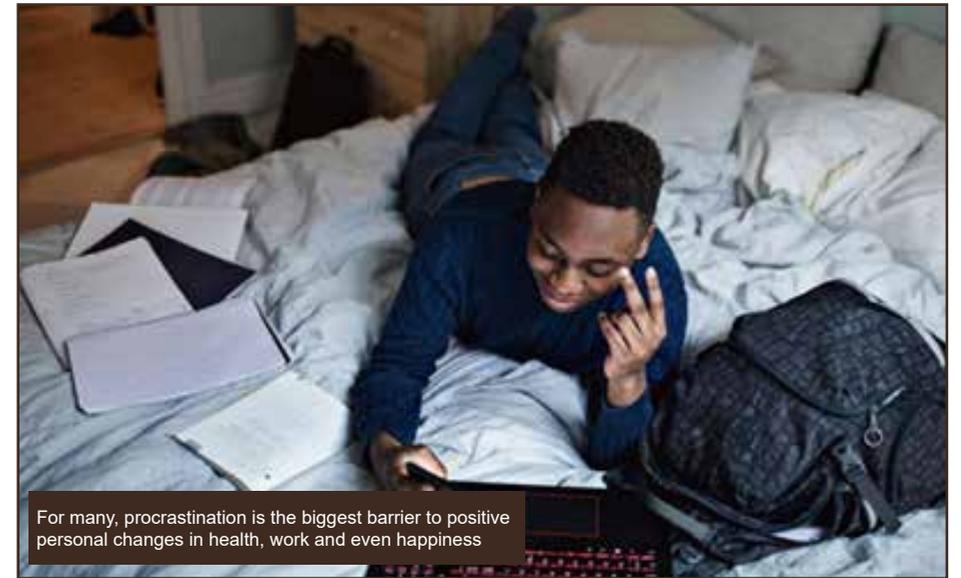

By David Robson, BBC WorkLife

due to deliver a written assignment, worth a third of their final grade. To measure their progress, the students were all sent regu-

tions.

The benefits were not immediate; Wessel says the students needed to consider the different reflec-

er putting a couple of daily reminders in your online calendar to ensure that you actually take the time to look at the prompts. "If you

For many, procrastination is the biggest barrier to positive personal changes in health, work and even happiness

lar text messages, asking them to estimate their overall progress in completing the assignment (from 0% to 100%). Those taking part in the intervention were also asked to reflect on the points listed above at various points over the course of the two weeks. Wessel hoped that contemplating these prompts could bring about the same changes in thinking usually achieved during in-person therapy, but in much shorter bursts. "It's replicating some of the elements that you would get in a coaching or counselling or therapeutic session," he says, "but it's like a 'micro-dose'."

When he compared the progress updates of the participants over the course of the two weeks, Wessel found that those contemplating the four reflection points were significantly more likely to get on top of the work early, rather than putting off the assignment until the end of the fortnight. It had, in other words, significantly reduced their procrastina-

tion points a few times before they started taking action – a phenomenon he describes as a "sleeper effect". "There are only so many times that you can tell the app that you know exactly what you need to do, but then not do it," he says. You might expect the students to have been irritated by the reminders, but most reported that they had learnt a lot from the experience. "They said that we should do this for every course they have."

## A 'promising approach'

Van Eerde is impressed by the results, and optimistic about the practicality of the intervention. "I think it's one of the more promising approaches," she says.

Wessel has already designed an app to help encourage people to improve their diet that follows similar principles, and he speculates that, no matter our goals, we might all benefit from regularly considering these reflection points. If you want to apply this yourself, you might consid-

notice that you are always putting stuff off, they could be a good way of checking your behaviour."

The important thing, he says, is to regularly question what goals you actually value, and to check whether you're prioritising them enough. You should then work out ways to chunk your task into smaller parts, before taking action on the first possible step. This can create a kind of momentum, he says, which will make procrastination less likely as you go along.

Wessel's work joins a growing body of research showing how short moments of self-reflection can pay great dividends. A little focused thinking, it seems, can go a long way to increasing your perseverance, organisation and efficiency, so that you have more time to spend on the things that really matter. Those few prompts may just be the secret to a happier and healthier new year.

To make sure you're regularly considering the four reflection points, you can set up reminders to ensure you actually take the time to reflect

## HIGH BLOOD PRESSURE WARNING: FRUITY YOGHURT COULD BE RAISING YOUR BLOOD PRESSURE READING

By Adam Chapman, Daily Express

**HIGH blood pressure is easily reversed by making healthy dietary decisions and sticking to them. While some dietary items are clearly off-limits, some ostensibly healthy items can raise your risk.**

High blood pressure can seem innocuous at first because it rarely produces symptoms, but it can lead to more serious conditions. That's because it causes your blood vessels to harden and narrow, which can choke the supply of blood

and oxygen to the heart. Fortunately, you can reverse the conditions by making healthy dietary decisions, although some are easier to make than others.

This is particularly true when it comes to choosing what to eat for breakfast in the morning.

As David Wiener, training specialist at AI-based fitness and lifestyle coaching app Freeletics explains to the Express.co.uk, there are patently obvious breakfast foods or drinks that should be avoided when

trying to control your blood pressure levels.

Obvious culprits include bacon and white toast with butter, to name only a few, he says. "However, there are some sneakily unhealthy foods that you may be reaching for when trying to opt for a healthy alternative which could be raising your blood pressure reading," says Wiener.

One deceptive dietary decision is opting for fruity yoghurt. "Fruity yogurts are often packed full of carbohydrates and sugar which can wreak havoc on your blood pressure levels," warns Wiener.

### Why is sugar so risky?

Research shows that sugar contributes to weight gain in adults and children. Studies indicate that being overweight and obesity predispose people to high blood pressure. What's more, added sugar, which often finds its way into yoghurts, may also have a direct effect on increasing blood pressure, according to a review.

As Wiener points out, plain yoghurt is a much safer bet and has been shown

Breakfast items: Processed cereals can also raise your blood pressure

to have a positive effect on high blood pressure. Greek yogurt in a particular is a nutrient-dense dairy product that's packed with minerals that help regulate blood pressure, including potassium and calcium. A review of 28 studies found that consuming 3 servings of dairy per day was associated with a 13 percent lower risk of high blood pressure, as well as that a seven-ounce (200-gram) increase in dairy intake per day was associated with a five percent reduction in hypertension risk.

### What other ostensibly healthy items should you be weary of?

"Eating processed cereals can be the worst way

to start your day if you are prone to getting high blood pressure," warns Wiener.

As Wiener explains, even cereals that claim to be 'healthy' or packed full of protein can cause an increase in blood pressure. "Most of them are still highly processed and contain far more carbohydrates and hidden sugars than you may realise which can contribute to a higher blood pressure reading," he says.

Any breakfast food item that is full of salt or sodium

is also guaranteed to raise your blood pressure reading, says Wiener.

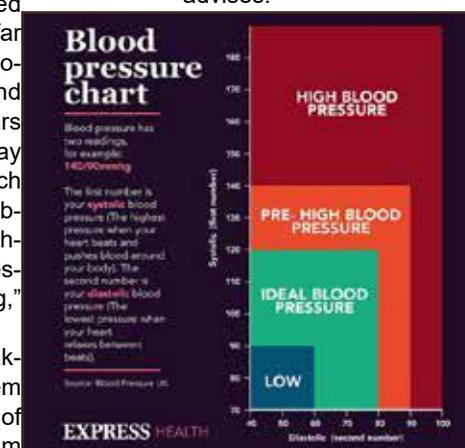

"Eating too much salt causes your body to hold in extra water in order to rid the excess salt from your body- this can cause your blood pressure to rise," he explains. "In addition, the added water puts stress on your heart and blood vessels," adds Wiener.

According to the NHS, you should aim to eat less than six grams (0.2oz) of salt a day, which is about a teaspoonful.

"Remember, whether you're eating at home, cooking or eating out, don't add salt to your food automatically – taste it first," it advises.

High blood pressure warning: Fruity yoghurts may contain added sugars

BBC website

## TRAVEL AFTER BREXIT: HOW WILL IT AFFECT MY HOLIDAYS TO THE EU?

**Rules on travelling to and from European Union countries changed on 1 January 2021.**

Can I go on holiday to the EU? As it stands, no. Because of Covid, travellers from most non-EU countries can't visit except for essential reasons. After 31 December, the UK is no longer treated like a member of the EU, so has become subject to these rules.

The only non-EU countries exempted are those with very low infection rates, such as New Zealand. The EU could choose to exempt the UK from these rules, or individual EU countries could create a "travel corridor"

with the UK, allowing restriction-free travel.

### Will I need a new passport?

No. Your current passport will be valid as long as:

- It is less than 10 years old
- And has six months left before it runs out
- (Both of the above must be true)
- The six-month rule won't apply for visits to Ireland, because it is part of the Common Travel Area.

If you need a new passport – which will be a different colour - the government

says you should apply in plenty of time.

### How long can I go for and will I need a visa?

If you're a tourist, you'll be able to travel to most EU countries - plus Switzerland, Norway, Iceland and Liechtenstein - without a visa. You'll be able to stay for up to 90 days in any rolling 180-day period. So, an Easter weekend in Spain, followed by a June fortnight in Italy, would both count towards your 90-day limit.

The rules for Bulgaria, Croatia, Cyprus and Romania are different. You could make a 90-day trip to any of them and still not use up your 90-day allowance for other EU countries.

You may need a visa or permit to stay for longer, to work or study, or for business travel. From 2022, UK nationals will have to pay for a visa-waiver scheme in order to visit many European countries.

### What queue can I use at passport control?

You'll no longer be able to use EU fast-track passport control and customs lanes. When you arrive in an EU country (except Ire-

land) be prepared to show your return ticket. You could be asked to show you have enough money for your stay. It could also take longer to cross the UK border..

### Will I face mobile phone roaming charges?

The guarantee of free roaming throughout the EU, Iceland, Liechtenstein and Norway ends on 1 Janu-

ary 2021. You should check with your mobile provider to see if you're likely to face extra charges when you travel. The four main UK operators have said they have no plans to reintroduce roaming fees.

### The government has passed laws to protect customers, including:

- £45-a-month cap on using mobile data abroad (then you must opt-in to use more)
- Requirements for cus-

tomers to be informed when they've reached 80% and 100% of their data allowance.

### Are pet passports still valid?

Pet passports issued in Great Britain will not be valid for travel to the EU from 1 January 2021. A new system will apply from that date. From 1 January 2021

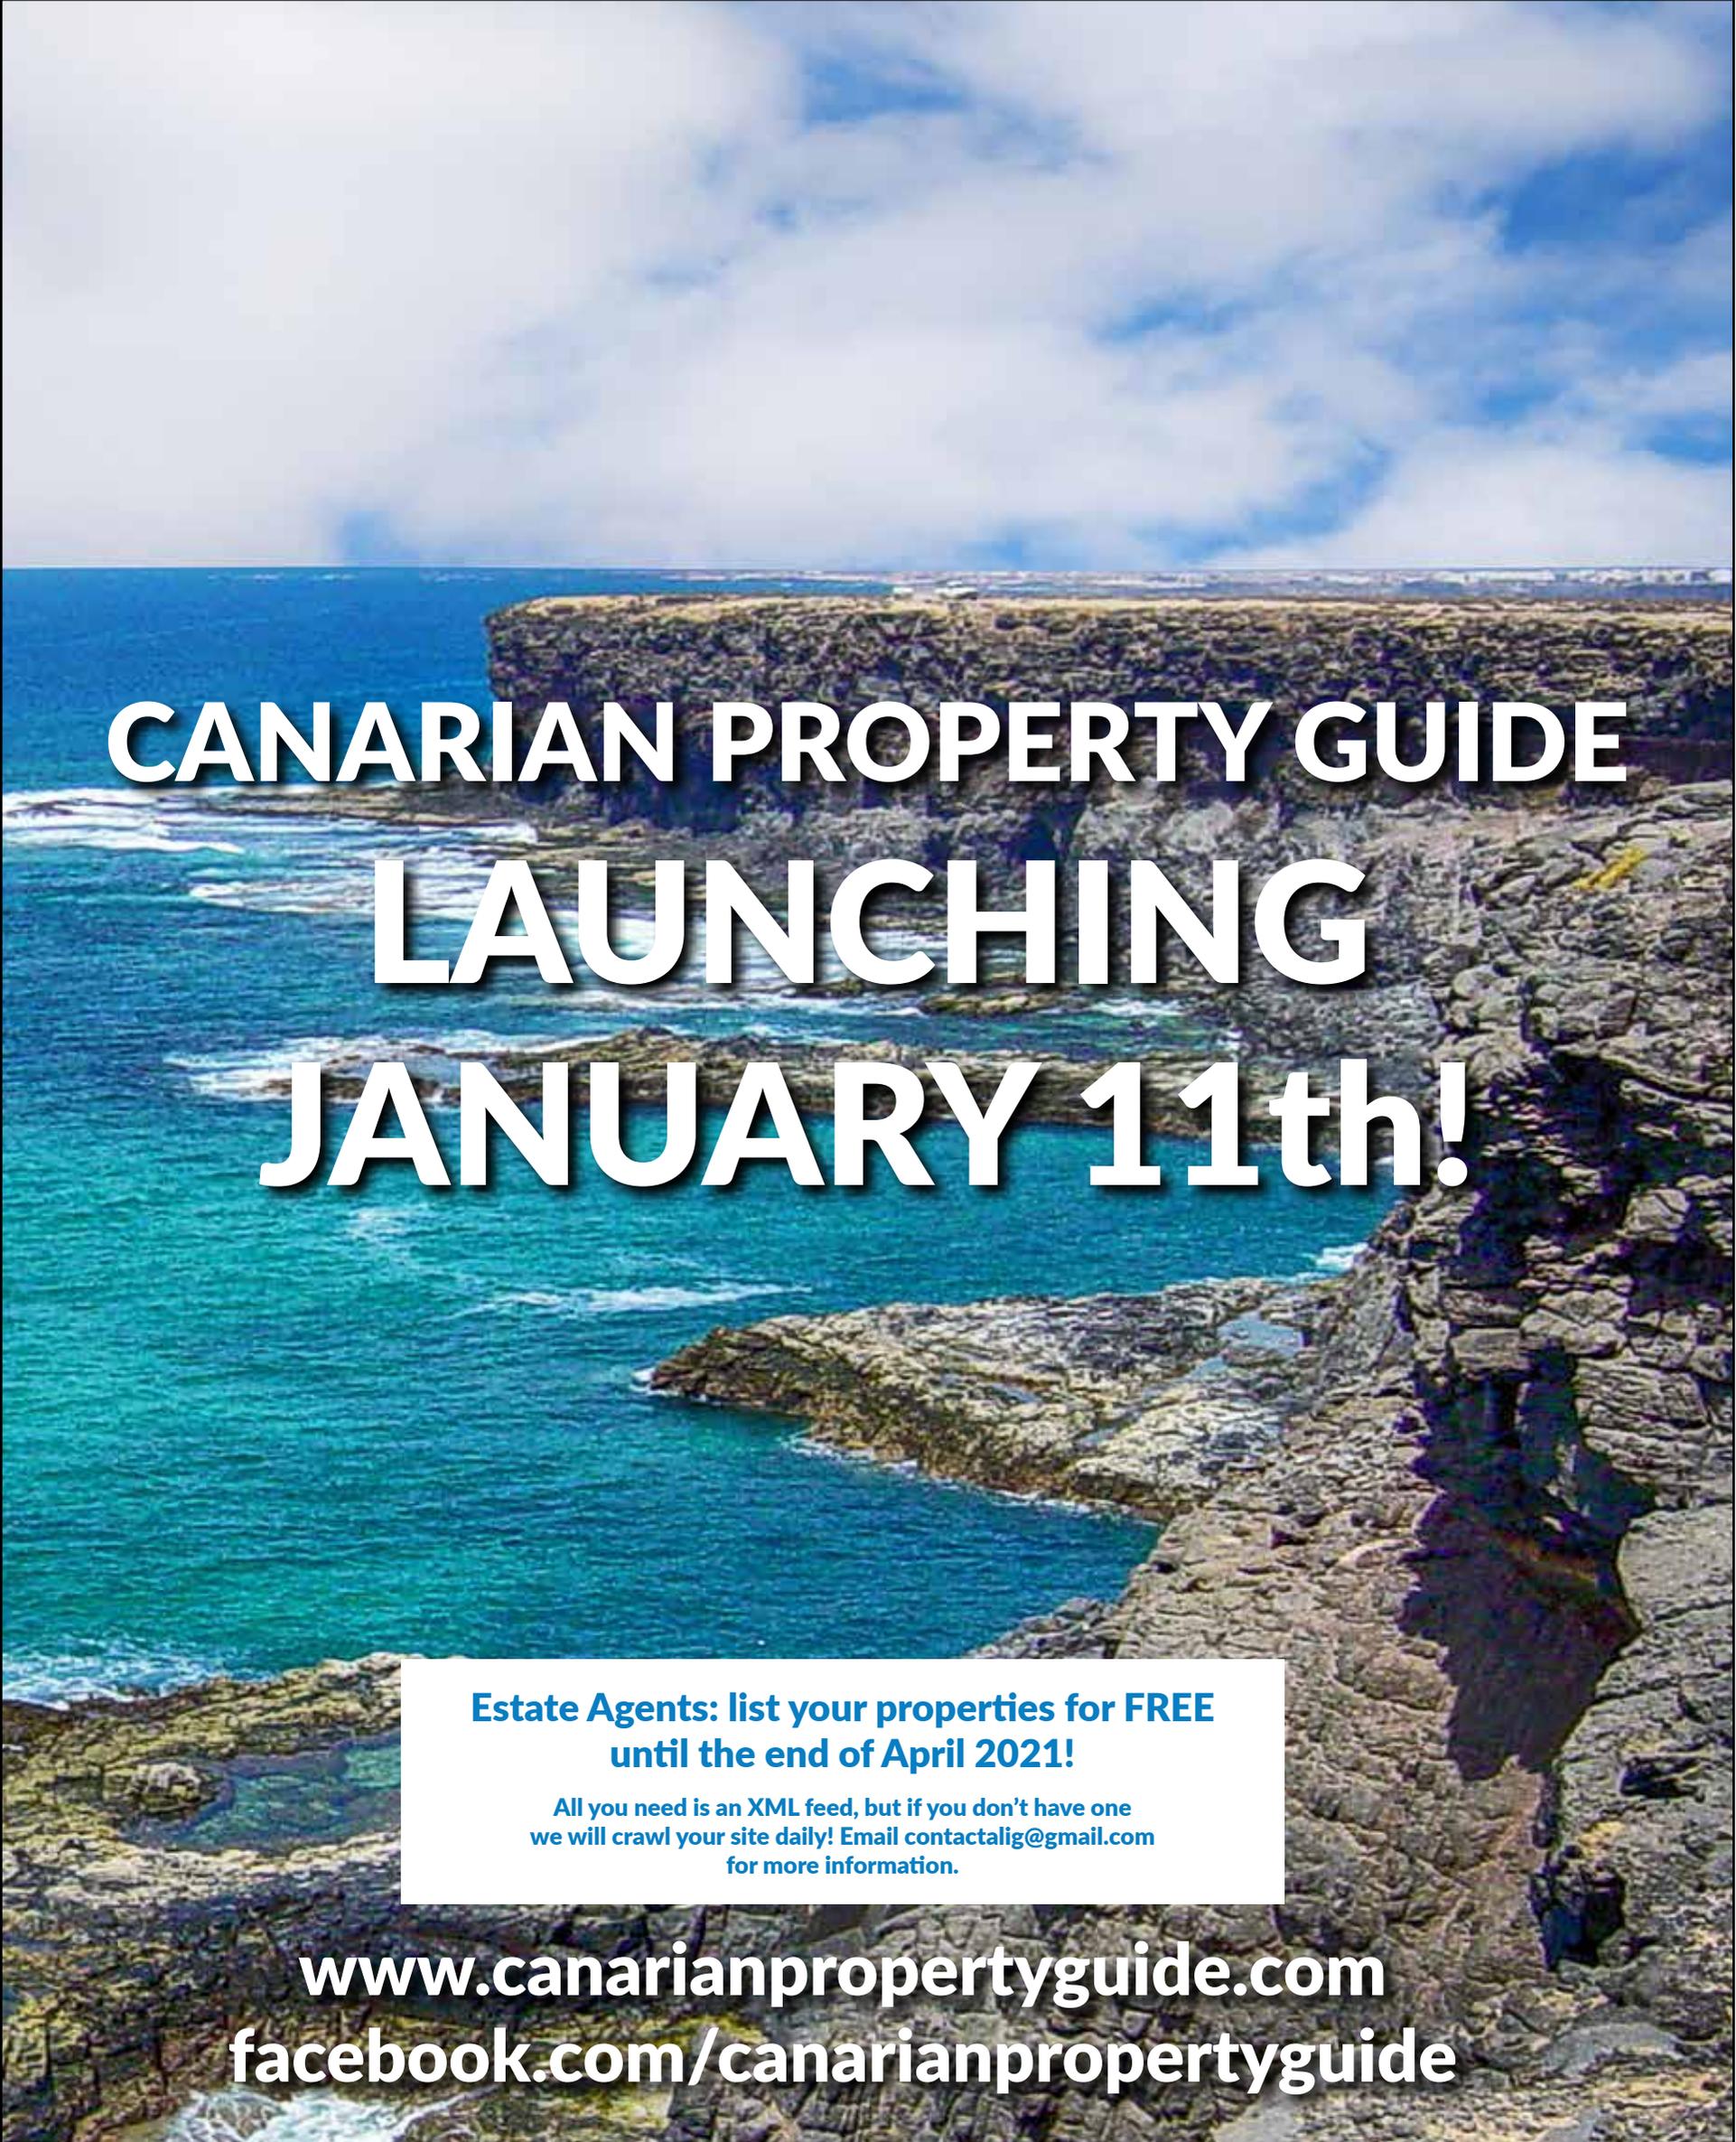

gle trip into the EU, onward travel within the EU and re-entry to Great Britain. Your pet must have been microchipped and have had a rabies vaccination. It will also have to have a treatment against echinococcus multilocularis (a type of tapeworm) for entry into Finland, Republic of Ireland, Northern Ireland, Norway or Malta.

### Can I buy duty free?

Passengers from Great Britain (England, Scotland and Wales) travelling to EU countries can take advantage of duty-free shopping from January 2021. Current duty-free limits on tobacco and alcohol, which apply only to non-EU countries at the moment, will also increase in the new year. But there'll no longer be tax-free airport sales of goods like electronics and clothing.

In 2002, this dog was the first to travel to the UK using a pet passport

## LAS CHAFIRAS BOOK SHOP

The Bookshop is located at Calle Luciano Bello Alfonso No 5 in Las Chafiras (behind and above Pit Team Sur and the Golf Shop, and opposite Marrero Homes). Books cost just €3.00 but we offer a 'Buy two get one FREE' system and we buy books we don't have for 50 cents each.

We now have more than 10,000 books to choose from, either in the Shop itself, or via the internet (www.laschafirasbookshop.com), where you can 'browse' our inventory and order - we will be happy to deliver to anyone not able to get in.

Should you come to the shop and no one is in, just call us on either 609 714 276 or 627 230 360 - we're never very far away and will get back as fast as we can - while you have a coffee at one of the many cafés nearby!
